

PATRICK COUNTY HIGH SCHOOL
PROGRAM OF STUDIES
2017-2018

The mission of Patrick County High School is to build a foundation for lifelong learning that prepares students for responsible citizenship.

Patrick County High School
215 Cougar Lane
Stuart, VA 24171
(276) 694-7137

Principal's Message

Dear PCHS Students and Cougar family:

Welcome to that exciting time of the year when you choose the courses you will take during the upcoming school year.

The Patrick County Public School System's high school program provides students many options based on their career goals, needs and individual interests. Students may choose from a wide array of courses and programs. Choices students make in high school affect the options they have for future education and job opportunities after high school.

Students may select courses from arts education, career and technical education, computer education, English language arts, English as a Second Language, mathematics, media, JROTC, science, second languages and social studies. There are also additional course opportunities available via Virginia Virtual Public School online courses and through a partnership with Patrick Henry Community College. Membership and participation in numerous clubs, organizations, and teams are also available.

This planning guide is provided to assist students and their parents or guardians in the planning and registration process. It is the responsibility of all students and their parents or guardians to make sure students are registered for the courses they need in order to meet graduation and college/university admission requirements. Your guidance counselors are also ready to assist you with this process.

Best wishes as you plan your future as a cougar and for a successful 2017-2018 school year.
It's a GREAT day to be a cougar!!!

Kenneth "Trey" Cox

The Patrick County School Board does not unlawfully discriminate on the basis of age, sex, race, color, religion, disability, or national origin in its employment practices or educational programs and activities. The Administrator for Special Education is designated as coordinator for non-discrimination for access to and implementation of programs under Section 504 and the American with Disabilities Act. The Assistant Superintendent of Administration and Human Resources is designated as coordinator for non-discrimination regarding personnel matters under Section 504, the American with Disabilities Act and Title IX. Specific complaints of alleged discrimination under Title VI of the Civil Rights Act should be referred to the Assistant Superintendent of Administration and Human Resources as well.

HIGH SCHOOL CURRICULUM

General Information

The information in this guide is designed to help students and parents with the selection of courses for eighth through twelfth grades. Students should study this publication and consult with their parents, school counselors, and teachers in planning their individual program of study. School counselors can help with planning by analyzing test scores and records of past achievements and by discussing current interests and long-term goals. School counselors also have up-to-date information available about various training programs, schools, colleges, universities, and employment possibilities.

Registration

During registration, students will be given information concerning course selection for the coming year. The information in this guide should be used in planning a program of studies. The courses listed will be offered for the school year only if there is sufficient enrollment and available staff and funding. Grade levels listed for courses indicate the grade(s) in which the course is normally taken. All students will be expected to maintain a full-day schedule of classes in order to meet at least the minimum standards necessary for graduation as mandated by Patrick County Public Schools and the Virginia State Board of Education.

Any student wishing to be a part of the D-Squared program or wishing to enroll in a dual enrollment course during the 2017-2018 school year must have all necessary PHCC registration paperwork and placement testing completed by the PCHS registration day.

Access to Courses

Course descriptions indicate if any prerequisite courses are required in order to enroll in a class. A minimum enrollment is required in order for a class to be offered: PCHS minimum enrollment is 12 and PHCC minimum enrollment is 15.

Standards of Learning Tests

Students must take all applicable end-of-course Standards of Learning (SOL) tests following course instruction. **Students who successfully complete a course and who achieve a passing score on an end-of-course SOL test or a substitute test for that course shall be awarded a verified credit.** End-of-course tests that are available are listed in the following chart. All students enrolled in a course that has an SOL test must take the test. Students who pass an SOL course but fail the SOL test are given every opportunity to retake the SOL test. To assist in planning, we ask the student to submit in writing, by the following deadlines, his/her intent of testing:

Fall Testing Administration: by September 30th
 Spring Testing Administration: by January 31st
 Summer Testing Administration: by May 30th

When this opportunity arises, students are given a refusal slip if they do not wish to retake that SOL. This slip must be signed by the student, parent and School Testing Coordinator.

Counseling

School counselors, together with parents, assist students in developing self-understanding in order to determine the best use of their abilities. Counselors encourage students to examine educational and career opportunities and to make realistic plans and decisions for the future.

Educational and career planning are reviewed with each student annually. Both individual and group counseling services are available for those students who are experiencing social, emotional, or academic difficulties. Parents are encouraged to meet with counselors if they have concerns about their child's progress and to attend meetings relating to educational planning and the instructional programs offered.

Gifted Education

The gifted education program provides services for students in accordance with the Standards of Quality. The program is designed to address individual learning styles, needs and interests. Patrick County Public Schools require appropriately differentiated instructional services for students at all grade levels. The Patrick County Public Schools *Local Plan for the Education of the Gifted* provides detailed information on referral and identification processes as well as the services provided for identified students.

Programs for Students with Disabilities

Special education is an essential part of the total program of public education in our community, sharing with elementary, middle, secondary, and technical education the responsibility for providing instruction, training, and necessary supportive services for all children of Patrick County. The educational interests of children with various types of exceptionality can best be served when they are accepted as an integral part of the total school program. As the law mandates, the education of disabled students in the “least restrictive environment” is emphasized. Special education, as is true for all education, is based on the fundamental concept of the dignity and worth of the human personality. The school division’s commitment is to provide an appropriate program for all special needs children.

English Language Learners (ELL)

At each grade level, ELL students engage in instructional activities to increase listening, speaking, reading and writing skills. While building on their prior knowledge and learning new material, students are provided support services through a cohesive program. Proficiency is determined by the WIDA WAPT Screening Assessment and/or the WIDA ACCESS Test. Students build Basic Interpersonal Communication Skills (BICS) and Cognitive Academic Language Proficiency (CALP) through an inclusion model.

Remediation Programs

Remedial education in the subject areas of reading, English, science, history/social sciences and mathematics are offered for eligible students experiencing difficulty with Standards of Learning concepts. Remediation programs are offered through after-school tutoring and in-school remediation services provided prior to SOL testing.

Grade Removal Notification

This notice is to inform parents of rising ninth-grade students that, according to Standards of Accreditation 8VAC-20-131-90, they have the right to have their child’s grade omitted from his/her transcript for the high school credit courses in which their child was enrolled during their eighth grade year. Should parents/guardians choose to omit their student’s grade, the student will not receive credit for the course. To have a child’s grade expunged, parents should submit a written request to the principal of the high school prior to registration of the student’s ninth grade year.

Repeating a Course

The grade for any failed class shall remain a part of a student’s academic transcript. Students who repeat a failed class shall have both course grades recorded.

Credit Recovery

Students may be given an opportunity to complete the requirements of specific failed courses through alternative methods that utilize online credit recovery program, after-school, and summer school options.

Alternative Education

An alternative education program may be offered for students in grades eight through twelve who are not succeeding in the traditional school environment. A regional alternative school is available for students in grades eight through twelve who have experienced trouble with juvenile authorities or have multiple suspensions or an expulsion.

Promotion Policies

Promotion to the next grade is based on the total cumulative number (units) of credits earned by a student at the end of the school year. They are:

From Grade 8 to Grade 9	Promotion or Placement
From Grade 9 to Grade 10	6 credits
From Grade 10 to Grade 11	12 credits
From Grade 11 to Grade 12	18 credits

Course Changes

The student benefits from a well-planned schedule that addresses individual needs and does not require later adjustments that might disrupt the learning process. Commitments for staff, textbooks, and supplies are made based upon the courses selected; therefore, schedule changes are discouraged. If there are extenuating circumstances, requests for schedule changes are carefully reviewed based on the following:

- Scheduling error has occurred.
- Student has changed career goal as confirmed by a counselor.
- Student has been scheduled for a course which is not compatible with abilities.
- Student has not met course prerequisites. Student has failed a required course for graduation.
- Student schedule needs to be balanced academically between the two semesters.

Revisions to balance academic loads and/or sequence courses should be addressed BEFORE the school year begins. Students having any problems with his/her schedule should contact their school counselor to discuss the matter during school office hours by visit, email, or phone before the start of the 2017-2018 school year. Once a student is enrolled in a course for a maximum of 20 instructional hours, no schedule changes will be made. All students at PCHS must be registered in eight units each school year and four courses each semester unless provisions have been approved. Additional credits may be obtained after-school through the cooperative education program and the approved course recovery program.

Driver Education

The classroom driver education course is offered as part of the tenth grade health education curriculum. When students complete the classroom phase and have secured a learner's permit, they may sign up to take behind-the-wheel driver instruction. Students are responsible for providing payment for the designated fee associated with this program when signing-up.

D² or D-Squared The Dual Degree Program at Patrick County High School

D² is a partnership between Patrick Henry Community College and Patrick County Public Schools. Students admitted to D² will earn an Associate's Degree from Patrick Henry Community College by taking courses during their junior and senior years of high school. Courses will be taught at Patrick County High School and PHCC Stuart Campus.

Students interested in enrolling should contact the PCHS Student Services Department the spring of their sophomore year for an application.

Governor's School

Governor's Schools provide appropriate learning endeavors for gifted students in Summer Residential Governor's Schools (SRsGS) and the Summer Regional Governor's Schools (SRgGS). Governor's Schools give gifted students academic, visual and performing arts opportunities beyond those normally available in the students' home schools. Students are able to focus on a specific area of intellectual or artistic strength and interest. If interested, please contact the Director of Student Services for more information.

ONLINE COURSE OFFERINGS & ADVANCED PLACEMENT

Learning Online

An Advanced Placement Course is a college level course taught in the high school context using a standardized course syllabus aligned with the College Board Advanced Placement test for that course. The advanced placement courses are for those students willing to accept the challenge of a rigorous academic curriculum. The degree of difficulty, workload, and time required are equivalent to an introductory college course. Students and parents should work closely with counselors to ensure that the four-year plan includes the prerequisites and subsequent advanced courses.

Advanced Placement (AP) courses will enable students to earn college credits during high school, while saving time and money on future college tuition. Courses are taught in an online format, with the students working closely with the course instructor through email. Students will be required to take the Advanced Placement (AP) exam for the class, and the exam fees must be paid by the first day of class. Earning qualifying scores on such exams may result in college credits being granted in those subject areas. However, this decision is made by the individual college.

Students enrolling in Virtual Virginia who are participants in the Early College Scholars program will pay the Advanced Placement Exam fee prior to the beginning of class. If the student scores a 3 or a 4 on the exam then his/her exam fee will be reimbursed. World language courses are tuition-free for all Virginia public school students.

Students that are interested in Virtual Virginia should be self-motivated and possess a strong academic foundation. It would be very beneficial for students to have internet access at home. There is no limit to the number of courses that a student may take if the student meets the course prerequisites.

VDOE Virtual Virginia Advanced Placement School 4x4 block Online Course Offerings

Information about the program is available at www.virtualvirginia.org or see your school counselor. *Availability of course offerings and enrollment is determined by Virtual Virginia.* Course descriptions are available at:
<http://www.virtualvirginia.org/courses/catalog/>

****Additional non-advanced placement courses may be available upon approval.**

DUAL ENROLLMENT COURSES

Dual Enrollment courses allow high school students to meet the requirement for high school graduation while simultaneously earning college credit. Patrick County students are eligible to take Dual Enrollment courses through Patrick Henry Community College. Dual Enrollment provides students access to the same course content and curriculum that is offered on the community college campus, at the high school. Therefore, additional assignments will be required by PHCC in order to obtain dual enrollment credit. **Any student wishing to be a part of the D-Squared program or wishing to enroll in a dual enrollment course during the 2017-2018 school year must have all necessary PHCC registration paperwork and placement testing completed by PCHS registration day.**

For a dual enrollment course to be taught, there must be a minimum of fifteen students enrolled. Enrollment in these classes is contingent upon a student achieving a passing score on a PHCC placement test, acceptance in the course by the college, and availability of credentialed instructors. Fees are paid in accordance with school procedures.

Dual Enrollment Course Offerings	
Advanced Composition (D-Squared)	Human Information Literacy (D-Squared)

ACADEMIC HONORS

Superintendent Scholar: A student must have all A's every nine week grading period and no discipline referrals.

Superintendent's Commendation List: A student must have all 'A's' or at least a 4.0 semester grade point average.

Principal's Honor Roll: A student in grades 9-12 must earn a 3.20 or higher grade point average, and a student in eighth grade must have an average of 88 or higher.

Teacher's Commendation List: A student nominated by each teacher each semester for having shown the most improvement in academics and/or conduct.

BETA Club: A student must maintain a 3.75 or higher cumulative grade point average. Students in 8th grade may join the Junior Beta Club. Students in the 9th -12th grades may join the Senior Beta Club.

Academic Letter: A student in grades 9-12 who earns a 4.0 or higher grade point average for the year shall be awarded an Academic Letter the first year and a Bar for each subsequent year.

Junior Class Marshall: A student in grade 11 who earns a 4.0 or higher cumulative grade point average will serve as a Junior Marshal at graduation. This determination will be made at the conclusion of the 3rd nine weeks of the junior year.

Presidential Academic Fitness: A student must have a GPA of 3.5 or higher and exceptional achievement test scores.

GRADUATION

Virginia students can earn either an Advanced Studies Diploma, Standard Diploma or a Standard Diploma with Credit Accommodations. Students must earn a combination of standard and verified units of credit to receive one of these diplomas.

Graduation Ceremony

Students who complete graduation requirements during the regular school year are eligible to participate in the graduation ceremony.

Honor Graduates

Graduates with a GPA of 4.0 or higher will be recognized as Honor Graduates at Patrick County High School. Patrick County High School will recognize the graduating senior with the highest GPA as the valedictorian, and the graduating senior with the second highest GPA as the salutatorian. This determination will be made at the conclusion of the 3rd nine weeks of the senior year.

DEFINITIONS

Standard Unit of Credit

A standard unit of credit is awarded for a course in which the student successfully completes the objectives of the course.

Verified Unit of Credit

A verified unit of credit is awarded for a course in which the student earns a standard unit of credit and achieves a passing score on a corresponding end-of-course SOL test or a substitute assessment approved by the Board of Education. Students who are enrolled in a career and technical program area and pass a certification exam and/or licensure may earn a student-selected verified credit. A student-selected test for verified credit may come from any end-of-course SOL test that is not already satisfying a required verified credit. Local verified credits will be awarded in accordance with Patrick County School Board Policy.

Sequential Electives

Sequential electives are defined as two or more courses of study in a focused sequence of elective courses.

Fine Arts or Career and Technical Education Course

The following courses will meet the fine arts graduation requirement: all art courses, all music courses and all drama courses. All Career and Technical courses will meet the graduation requirement. The course taken to satisfy the Fine Arts or Career and Technical Education course requirement may also serve as one of the two credits required to satisfy the sequential electives requirement.

Career Concentration

A Career Concentration is a coherent sequence of courses completed by a student in a specific career area.

ADVANCED STUDIES DIPLOMA

For students entering the 9th grade for the first time in 2012 or later

Subject Area	Standard Units of Credit	Verified Units of Credit	SOL Tests for Verified Credit
English	4	2	English 10 Writing <u>and</u> English 11 Reading
Mathematics ^{Note 1}	4	2	Algebra I, Geometry or Algebra II
Science ^{Note 2}	4	2	Earth Science, Biology or Chemistry
History and Social Science ^{Note 3}	4	2	World Geography, World History I, World History II or VA/US History
Foreign Language ^{Note 4}	3		
Health and Physical Education	2		
Fine Arts or Career and Technical Education Course*	1		
Economics and Personal Finance	1		
Electives*	3		
Student-Selected Tests ^{Note 5}		1	One additional from Mathematics, Science, History/Social Science or Career and Technical Education Course (CTE)
Total ^{Note 6}	26	9	

Students may earn an Advanced Studies Diploma by earning the required standard and verified units of credit as specified in the chart above.

NOTE 1

- For students entering the ninth grade for the first time in 2011-2012 and beyond: Courses completed to satisfy this requirement shall include at least three different course selections from among: Algebra I, Geometry, Algebra II, or other mathematics courses above the level of Algebra II. The Board shall approve courses to satisfy this requirement.

NOTE 2

- For students entering the ninth grade for the first time in 2011-2012 and beyond: Courses completed to satisfy this requirement shall include course selections from at least three different science disciplines from among: earth sciences, biology, chemistry, or physics or completion of the sequence of science courses required for the International Baccalaureate Diploma. The Board shall approve courses to satisfy this requirement.

NOTE 3

- For students entering the ninth grade for the first time in 2011-2012 and beyond: Courses completed to satisfy this requirement shall include U.S. and Virginia History, U.S. and Virginia Government, and two courses in either world history or geography or both. The Board shall approve courses to satisfy this requirement.

NOTE 4

- Courses completed to satisfy this requirement shall include three years of one language or two years of two languages.

NOTE 5

- **For students entering the ninth grade for the first time in 2011-2012 and beyond:** A student may utilize additional tests for earning verified credit in computer science, technology, career or technical education, economics or other areas as prescribed by the Board in 8 VAC 20-131-110.

ELECTIVES

- **Fine Arts and Career and Technical Education** – The Standard and Advanced Studies Diplomas each contain a requirement for one standard unit of credit in Fine Arts or Career and Technical Education. The Standards of Accreditation do not require that courses used to satisfy the requirement of Fine Arts or Career and Technical Education be approved by the Board. Therefore, local school officials should use their own judgment in determining which courses students take to satisfy this requirement.
- **Foreign Language**—The Advanced Studies Diploma contains a requirement for either three years of one foreign language or two years of two languages. In March 1998, the Board of Education approved the provision of three years of instruction in American Sign Language (ASL) for foreign language credit toward an Advanced Studies Diploma; other foreign languages will satisfy this requirement as well. Details of this action are available in: [Superintendent's Memo](#), Interpretive, #1, June 12, 1998.

NOTE 6

- **For students entering the ninth grade for the first time in 2013-2014 and beyond:** A student must successfully complete one virtual course, which may be non credit-bearing, to graduate with a Standard or Advanced Studies Diploma. Economics and Personal Finance will be offered in an online format to meet this requirement.

STANDARD DIPLOMA

For students entering the 9th grade for the first time in 2011 or later

Subject Area	Standard Units of Credit	Verified Units of Credit	SOL Opportunities for Verified Credit
English	4	2	English 10 Writing <u>and</u> English 11 Reading
Mathematics ^{Note 1}	3	1	Algebra I, Geometry or Algebra II
Science ^{Note 2, Note 6}	3	1	Earth Science, Biology or Chemistry
History and Social Science ^{Note 3, Note 6}	3	1	World Geography, World History I, World History II or VA/US History
Health and Physical Education	2		
Foreign Language, Fine Art, or Career and Technical Education Course ^{Note 7}	2		
Economics or Personal Finance	1		
Electives ^{Note 4}	4		
Student-Selected Tests ^{Note 5}		1	One additional from Mathematics, Science, Social Science or a Career and Technical Education (CTE) certification, competency, or credential.
Total ^{Note 8, Note 9}	22	6	

Students may earn a Standard Diploma by earning the required standard and verified units of credit as specified in the chart above.

NOTE 1

- For students entering the ninth grade for the first time in 2011-2012 and beyond: Courses completed to satisfy this requirement shall include at least two different course selections from among: Algebra I; Geometry; Algebra, Functions and Data Analysis; Algebra II, or other mathematics courses above the level of Algebra II. The Board shall approve courses to satisfy this requirement.

NOTE 2

- For students entering the ninth grade for the first time in 2011-2012 and beyond: Courses completed to satisfy this requirement shall include course selections from at least two different science disciplines: earth sciences, biology, chemistry or physics or completion of the sequence of science courses required for the International Baccalaureate Diploma. The Board shall approve courses to satisfy this requirement.

NOTE 3

- For students entering the ninth grade for the first time in 2011-2012 and beyond: Courses completed to satisfy this requirement shall include U.S. and Virginia History, U.S. and Virginia Government, and one course in either world history or geography or both. The Board shall approve courses to satisfy this requirement.

NOTE 4

- Courses to satisfy this requirement shall include at least two sequential electives as required by the Standards of Quality.

NOTE 5

- For students entering the ninth grade for the first time in 2011-2012 and beyond: A student may utilize additional tests for earning verified credit in computer science, technology, career and technical education, economics or other areas as prescribed by the Board in 8 VAC 20-131-110.

NOTE 6

- Students who complete a career and technical education program sequence and pass an examination or occupational competency assessment in a career and technical education field that confers certification or an occupational competency credential from a recognized industry, trade, or professional association or acquire a professional license in a career and technical education field from the Commonwealth of Virginia may substitute the certification, competency credential or license for (1) the student selected verified credit and (2) either a science or history and social science verified credit when the certification, license or credential confers more than one verified credit. The examination or occupational competency assessment must be approved by the Board of Education as an additional test to verify student achievement.

NOTE 7

- **For students entering the ninth grade for the first time in 2011-2012 and beyond:** Pursuant to Section 22.1-253.13:4, *Code of Virginia*, credits earned for this requirement shall include one credit in fine or performing arts or career and technical education.

ELECTIVES

- **Sequential Electives** – Effective with the graduating class of 2003, students who wish to receive a Standard Diploma must successfully complete two sequential electives. On February 5, 2002, the Board of Education approved [Guidelines for Sequential Electives for the Standard and Modified Standard Diploma](#) (PDF).
 - Sequential electives may be in any discipline as long as the courses are not specifically required for graduation.
 - Courses used to satisfy the one unit of credit in a fine arts or career and technical education course may be used to partially satisfy this requirement.
 - For career and technical education electives, check with the Guidance office.
 - An introductory course followed by another level of the same course of study may be used.
 - Sequential electives do not have to be taken in consecutive years.
- **Fine Arts and Career and Technical Education** – The Standard and Advanced Studies Diplomas each contain a requirement for one standard unit of credit in Fine Arts or Career and Technical Education. The Standards of Accreditation do not require that courses used to satisfy the requirement of Fine Arts or Career and Technical Education be approved by the Board. Therefore, local school officials should use their own judgment in determining which courses students take to satisfy this requirement.

NOTE 8

- **For students entering the ninth grade for the first time in 2013-2014 and beyond:** A student must successfully complete one virtual course, which may be non credit-bearing, to graduate with a Standard or Advanced Studies Diploma. Economics and Personal Finance will be offered in an online format to meet this requirement.

NOTE 9

- **For students entering the ninth grade for the first time in 2013-2014 and beyond:** Beginning with first-time ninth-grade students in the 2013-2014 school year, requirements for the standard diploma shall include a requirement to earn a career and technical education credential that has been approved by the Board, except when a career and technical education credential in a particular subject area is not readily available or appropriate or does not adequately measure student competency, in which case the student shall receive competency-based instruction in the subject area to satisfy the standard diploma requirements. The career and technical education credential, when required, could include the successful completion of an industry certification, a state licensure examination, a national occupational competency assessment, or the Virginia workplace readiness skills assessment.

ADDITIONAL DIPLOMAS

Standard Diploma With Credit Accommodations

For students entering the 9th grade for the first time in 2013 or later

The Standard Diploma with Accommodations program is intended for certain students at the secondary level who have a disability and are unlikely to meet the verified credit requirements for a Standard Diploma. Eligibility and participation in this program shall be determined by the student's Individual Education Program (IEP) team or the 504 committee and the student, where appropriate, at any point after the student's eighth grade year. This diploma type holds the same course requirements as a Standard Diploma but with accommodations given toward the verified credit requirements in English and Math. Refer to the Standard Diploma requirements on pages 10 and 11. The number of verified credits required remain the same in each subject area but can be earned by passing the course and attempting the associated SOL a minimum of two times with at least one of those attempts earning a score of 375 or higher. Example: One Math verified credit awarded in Algebra I for a passed course and two attempts at the SOL with scores of 365 on the first attempt and 385 on the second attempt.

Applied Studies Diploma

Available to students with disabilities who complete the requirements of their Individualized Education Program (IEP) and who do not meet the requirements for other diplomas.

HIGH SCHOOL DIPLOMA SEAL REQUIREMENTS

Board of Education Advanced Mathematics and Technology Seal

To earn a Board of Education Advanced Mathematics and Technology Diploma Seal, students must:

1. Fulfill the requirements for either a standard or advanced studies diploma.
2. Satisfy all mathematics requirements for the Advanced Studies Diploma (four units of credit including Algebra II) with two verified units of credit with a "B" average or better.
3. Meet one of the following conditions:
 - Pass an exam that confers certification from a recognized industry, trade, or professional association.
Example: Microsoft Office Specialist
 - Pass an exam approved by the Board of Education that confers college-level credit in a technology or computer science area.

Board of Education Seal

The Board of Education Seal shall be awarded to students who complete the requirements for a Standard Diploma or Advanced Studies Diploma with an average grade of "A."

Board of Education's Seal for Excellence in Civics Education

The Board of Education's Seal for Excellence in Civics Education will be awarded to students who earn either a Standard or Advanced Studies Diploma and:

1. complete Virginia and United States History and Virginia and United States Government courses with a grade of "B" or higher; and,
2. have good attendance and no disciplinary infractions as determined by local school board policies and,
3. complete 50 hours of voluntary participation in community service or extracurricular activities. Activities that would satisfy the requirements of clause 3 of this subdivision include:
 - Volunteering for a charitable or religious organization that provides services to the poor, sick or less fortunate;
 - Participating in Boy Scouts, Girl Scouts, or similar youth organizations;
 - Participating in JROTC;
 - Participating in political campaigns or government internships, or Boys State, Girls State, or Model General Assembly; or
 - Participating in school-sponsored extracurricular activities that have a civics focus. Any student who enlists in the United States military prior to graduation will be deemed to have met this community service requirement.

Board of Education Career and Technical Education Seal

To earn a Career and Technical Education Diploma Seal, students must:

1. Earn a standard or advanced studies diploma.
2. Complete prescribed sequence of courses in a CTE concentration or specialization and maintain a "B" or better average in those courses.
3. Or meet one of the following conditions:
 - Pass an exam or occupational competency credential that confers certification from a recognized industry, trade, or professional association. Example: WISE Financial Literacy Exam
 - Acquire a professional license in a career and technical field from the Commonwealth of Virginia.
Example: Licensed Cosmetologist

HIGH SCHOOL DIPLOMA SEAL REQUIREMENTS

Board of Education Governor's Seal

The Governor's Seal shall be awarded to students who complete the requirements for an Advanced Studies Diploma with an average grade of "B" or better and successfully complete college level coursework that will earn the student at least nine transferable college credits in Advanced Placement (AP) or dual enrollment courses.

The Board of Education's Seal of Bi-literacy

The Board of Education's Seal of Bi-literacy certifies attainment of a high level of proficiency by a graduating high school student in one or more languages in addition to English, and certifies that the graduate meets all of the following criteria:

The Board of Education of the Bi-literacy will be awarded to students who earn a Board of Education-approved diploma and

1. pass all required End-of-Course Assessments in English reading and writing at the proficient or high level; and
2. be proficient at the intermediate-mid level or higher in one or more languages other than English, as demonstrated through an assessment from a list to be approved by the Superintendent of Public Instruction

EARLY COLLEGE / COMMONWEALTH SCHOLARS PROGRAMS

Commonwealth Scholars Program

Commonwealth Scholars is a national program that uses business leaders to motivate students, beginning in eighth grade, to complete a rigorous course of study in high school--one that will give them a boost in college and careers. The Commonwealth Scholars course requirements fall between existing requirements for the Standard Diploma and the Advanced Studies Diploma. Students who complete the curriculum will be eligible to receive a diploma seal from Patrick County Public Schools recognizing their achievement.

Core Course of Study for the Commonwealth Scholars Program

Requirements for a Virginia high school diploma, including verified credits, must be met for recognition as a Commonwealth Scholar. Commonwealth Scholars must successfully complete these specific core courses:

Subject Area	Required Units of Credit	Required Course(s)
English	4	English 9, 10, 11 & 12
Mathematics	3	Algebra 1, Geometry, and Algebra 2
Laboratory Science	3	Biology, Chemistry, and Physics
History & Social Science	3.5	Choose from: US and VA History, World History, US and VA Government, World Geography, Economics or Financial Literacy
Fine Arts or Career & Technical Education Course	1	Student Selected
Foreign Language	2	Student Selected (in the same language)

Early College Scholars Program

To qualify for the Early College Scholars program, a student must:

- Have a "B" average or better;
- Be pursuing an Advanced Studies Diploma; and
- Take and complete college-level course work (i.e., Advanced Placement, or dual enrollment) that will earn at least 15 transferable college credits.

ACADEMIC AND CAREER PLANS

Each student entering the eighth grade at Patrick County High School will have an Academic and Career Plan that has been created for them at the elementary school level. The Academic and Career Plan is designed to be a working document that maximizes student achievement by having the student accomplish goals in high school that lead to postsecondary and career readiness. The plan will be student-driven and maintained by school professionals working cooperatively to assist the student in reaching his or her goals in the most logical academic and career path. The student, parent or guardian, and school professional will maintain a plan agreed upon by all parties to ensure everyone is focused on working toward the same goals and analyze and adjust the Plan in response to new information to meet the needs of the student.

Sample Plan:

Academic & Career Plan

Diploma Type: Advanced Studies Standard Standard with Accommodations Other

COURSE DESCRIPTIONS

Selecting Courses

The Patrick County School Board supports the use of best practices that research and experience have shown to be effective for high school aged students. Such practices include, but are not limited to, teacher-directed instruction, group work, cooperative learning, peer tutoring, performance based assessments and student-directed learning. The high school offers a minimum of six and one-half hours of instruction each day, exclusive of the lunch period. Classes are arranged in a 4X4 block format schedule. All students will maintain a full day schedule of classes.

The following pages describe high school course offerings. Course selection patterns may affect course offerings. Students registered for a class with an enrollment too small or too large are notified by the school counselor and given the opportunity to make another course selection.

ENGLISH

English 8 (1120Y)—Year (Prerequisite: 7th grade Language Arts teacher recommendation, Limited Enrollment)

This course will emphasize numerous writing forms with elaboration on sentence variety, usage, and mechanics. Literature study includes the short story, nonfiction, poetry, drama, and the novel. Other areas include the mass media, library skills, and vocabulary. This course is intended for those who need a more comprehensive study of the topics with many opportunities for practice. Students enrolled in this course will take the English 8 Writing and Reading SOLs.

English 8—Semester (1120) (Prerequisite: None)

This course will emphasize numerous writing forms with elaboration on sentence variety, usage, and mechanics. Literature study includes the short story, nonfiction, poetry, drama, and the novel. Other areas include the mass media, library skills, and vocabulary. Students enrolled in this course will take the English 8 Writing and Reading SOLs.

*English 8 (Advanced) (1120A)
(Prerequisite: 7th Grade Language Arts Teacher Recommendation)*

The student will develop an appreciation for literature through a study of literary elements including the reading of novels. Narrative, expository, and persuasive writing will be a part of the course. Interviewing techniques and oral projects/speeches may be included. Students enrolled in this course will take the English 8 Writing and Reading SOLs.

English 9 (1130) – 1 credit (Prerequisite: None)

Students will develop interpersonal communication skills as well as those skills required for more formal public speaking opportunities. They will present and critique dramatic readings or literary selections and will continue to develop proficiency in making planned oral presentations. Students will apply knowledge of literary terms and forms to their reading and writing. They will be introduced to literary works from a variety of cultures and eras. Students will continue to develop their reading comprehension skills through utilizing strategies to identify

formats, text structures, and main ideas. Student will write narrative, persuasive, expository and informational forms. They will develop as writers by participating in a process for writing, including prewriting, organizing, composing, revising, editing, and publishing. Students will edit writings for correct grammar, capitalization, punctuation, spelling, sentence structure, and paragraphing. Students will develop skills in using print, electronic databases, and on-line resources to access information. Students will also use a standard style method to credit sources of ideas used in research writing. Research using the MLA Style Guidelines will be expected.

*English 9 (Advanced) (1130A) – 1 credit
(Prerequisite: English 8 Teacher Recommendation)*

This course emphasizes reading, presenting, and analyzing a variety of literature from different cultures, and time periods. In addition, the identification and close study of literary forms and varying elements of literature are emphasized. Writing consists of literary analysis, narrative, and expository essays. The student will study both modern and Shakespearean dramas, non-fiction, poetry, short stories and various novels. Diligent research using the MLA Style Guidelines will be expected. The final product will contain the research of topic of the student's choosing and will adhere to specific rules concerning the crediting of paraphrased and/or quoted materials, as well as, comprehension of the concept and consequences of plagiarism.

*English 10 (Year-long) (1140Y) – 1 credit
(Prerequisite: English 9 Teacher Recommendation)*

This class will provide an in-depth study of writing and reading skills needed to ensure success in class and on the end-of-course writing and reading SOL tests. Since the end-of-course writing SOL is administered in the 10th grade, writing will be a major focal point, and multiple writing activities will provide the students with many opportunities to perfect their writing skills. They will write through expository and persuasive assignments and will analyze and critique peer and professional writing. Effective techniques for organization and development will be used on a regular basis, and the complete writing process will be applied to develop written products. The students will edit for the correct use of language, sentence formation, punctuation, capitalization, and spelling. They will also develop skills in accessing, evaluating, organizing, and presenting information in the research process. The MLA style will be followed to credit sources used in research and to develop the finished research product. Student enrolled in this course will take the EOC Writing SOL.

*English 10 (1140) – 1 credit
(Prerequisite: English 9)*

Since the end of course Writing SOL is administered in the 10th grade, writing is a major focal point. Students will become skilled communicators in small group learning activities. They will assume and evaluate individual roles in presenting oral reports. They will also examine and critique the overall effectiveness of the group process. Students will read, comprehend, critique, and analyze a variety of literary works. They will interpret a variety of informational materials, such as labels, manuals, warranties, directions, applications, technical descriptions, contracts, and forms to complete specific tasks. Students will develop their expository writing skills by analyzing and critiquing peer and professional writing. They will learn effective techniques of organization and development by analyzing, revising, and evaluating various written forms and ideas. They will demonstrate understanding by applying the writing process in developing written products. They will edit writing for correct use of language, sentence formation, punctuation, capitalization, and spelling as part of the writing process.

Students will develop skills in accessing, evaluating, organizing, and presenting information in the research process. They will also credit sources for quoted and paraphrased information. research using the MLA Style Guidelines will be expected. Students will present writing in a format appropriate for audience and purpose. Student enrolled in this course will take the EOC Writing SOL.

English 10 (Advanced) (1140A) – 1 credit (Prerequisite: English 9 Teacher Recommendation)

Since the end of course Writing SOL is administered in the 10th grade, writing is a major focal point. The semester will be divided roughly in half between a focus on writing and an intensive study of literature. Writing consists of literary analysis, narrative, and expository essays, as well as a thorough study of grammar. The student will study Shakespearean drama, nonfiction, poetry, short stories, and various novels. Diligent research using the MLA Style Guidelines will be expected. The research paper will culminate with the student's research on a particular position in regards to a controversial issue. It will adhere to specific rules concerning the crediting of paraphrased and/or quoted materials as well as, the careful study and proper documentation of reliable electronic sources. Student enrolled in this course will take the EOC Writing SOL.

*English 11 (1150) – 1 credit
(Prerequisite: English 10)*

Since the end of the course Reading SOL is administered in the 11th grade, the focus of student learning will be in reading, understanding, and using a variety of informational texts. Students will develop specific reading skills in order to generalize ideas, make predictions, and follow directions. Students will identify and analyze the steps in their own reading process in order to broaden their critical understanding. In addition, students will increase their independence as learners of vocabulary by using prefixes, suffixes, roots, and derivations to determine meaning and relationships among related words. They will evaluate the use of figurative language in text. Students will use context and connotations to help determine the meaning of synonymous words and appreciate an author's choices of words and images. Students will understand literature as it relates to the cultural and historical period in which it was written. This study will include poetry and dramatic selections. Students will write clear and accurate personal, professional, and informational correspondence. Students will compose a documented research product that is based on valid resources and procedures. Students may be asked to deliver effective informative and persuasive presentations, using appropriate oral-communication skills. Students will continue to develop medial literacy by examining how media messages influence people's beliefs and behaviors. Student enrolled in this course will take the EOC Reading SOL.

*English 11 (Advanced) (1150A) – 1 credit
(Prerequisite: English 10 Teacher Recommendation)*

Since the end of course Reading SOL is administered in the 11th grade, reading comprehension is a major focal point. This is a study of American Literature, both classical and contemporary, and the identification of major themes, characterizations, periods, and writing styles of authors that are reflective of the history and culture. Students will develop expository and essay writing, comparison-contrast, literary analysis, and persuasive compositions by locating, evaluating, synthesizing, and citing applicable information with careful attention to organization and accuracy. Student enrolled in this course will take the EOC Reading SOL.

*English 11 (Honors) (1150H) (D-Squared)– 1 credit
(Prerequisite: English 10 Teacher Recommendation, Access to a computer and internet is highly recommended, passing score on a placement test administered by Patrick Henry Community College. Students will receive six college credits for English 111 and English 112.)*

Since the end of course Reading SOL is administered in the 11th grade, reading comprehension is a major focal point. Honors English is designed for students who are serious about their intellectual growth, who think maturely and who are curious about the literature they read. This course will concentrate on a survey of American Literature emphasizing writers' styles, contents and purposes according to the genre in which the authors work. The course will stress planning, writing and revising a variety of modes of discourse. Student enrolled in this course will take the EOC Reading SOL.

*English 12 (1160) – 1 credit
(Prerequisite: English 11)*

At the 12th grade level, students will analyze British literature and informational and technical texts to better develop their own reading process skills. Students will write various types of papers including a research paper, which will require the use of the MLA format and a presentation. Students will also complete a number of activities to help prepare them for the world beyond high school.

*English 12 (Advanced) (1160A) – 1 credit
(Prerequisite: English 11 Teacher Recommendation)*

The study of British literature is the focus of the course. Composition assignments could include the following: character sketch/personality profile; documented research report; satire for persuasion, entertainment, or both; application essay suitable for college; subject analysis; proposal presenting a solution to a problem or need. Composition conventions would include planning for audience and purpose; logical sequencing; clear and accurate elaboration of ideas; revision for depth of information and presentation; and editing for usage, spelling punctuation, and capitalization.

*English 12 (Honors) (1160H) (D-Squared) – 1 credit
(Prerequisite: English 11-H, Access to a computer and internet is highly recommended, passing score on a placement test administered by Patrick Henry Community College. Students will receive six college credits for English 243 and English 244.)*

This curriculum will cover the advanced English curriculum plus additional work in critical analysis of literature and writing. Students will study major works from the Anglo-Saxon period to the present, emphasizing ideas and characteristics of the British literary tradition. At times controversial materials may be discussed based on college level curriculum.

Creative Writing (1171) – 1 credit (Prerequisite: Must pass previous English class; Offered Grades 9- 12)

This course will offer students the opportunity to learn to write short stories, poetry, and one-act plays, as well as discover various literary genres. Attention will be given to ideas, structure, and style. Some class time will be devoted to actual writing and criticism of student work. All writing will ultimately lead to creation of semester long writing projects as students will create personal portfolios.

Introduction to Publication Production/Yearbook I & II (111041, 111042) – 1 credit

(Prerequisite: Teacher recommendation; Offered in grade 9)

These courses are introductory level courses to all concepts covered in Yearbooks III-VIII. Yearbook I and II cover introductory principles of media ethics, graphic design, page design and layout, photo cropping, reporting, copyrighting, copy-editing and advertising. It provides students with hands-on experience in planning and preparation of the school yearbook. Students are required to sell ads and/or contact businesses for the purpose of fund-raising. This is a publications course.

Publication Production/Yearbook III & IV (111043, 111044) – 1 credit

(Prerequisite: Teacher recommendation; Offered in grade 10)

Yearbook III and IV cover the principles of media ethics, graphic design, page design and layout, photo cropping, reporting, copyrighting, copy-editing and advertising. It provides students with hands-on experience in planning and preparation of the school yearbook. Students are required to sell ads and/or contact businesses for the purpose of fund-raising. This is a publications course.

Publication Production/Yearbook V & VI (111045, 111046) – 1 credit

(Prerequisite: Teacher recommendation; Offered in grade 11)

Yearbook V and VI continues the study of journalistic principles and practices and adds a “hands-on” approach to photography. Students will take part in the concept development, headline writing, picture taking, article writing and editing of the school yearbook. This is a publications course.

Publication Production/Yearbook VII & VIII (111047, 111048) – 1 credit

(Prerequisite: Teacher recommendation; Offered in grade 12)

Yearbook VII and VIII continue the application of photojournalism principles and practices with the use of desktop publishing. Yearbook VII and VIII students will take on added responsibilities and assist in each phase of the production of the school yearbook. Editing pages and teaching fundamentals of yearbook design to new staff members will also be required. This is a publications course.

MATHEMATICS

Math 8 (Year) (3112Y)

(Prerequisite: 7th Grade Math Teacher Recommendation)

The eighth-grade standards contain both content that reviews or extends concepts and skills learned in previous grades and new content that prepares students for more abstract concepts in Algebra and Geometry. Students will gain proficiency in computation with rational numbers (positive and negative fractions, numbers, and integers) and use proportions to solve a variety of problems. New concepts include solving two-step equations and inequalities, graphing linear equations, visualizing three-dimensional shapes represented in two dimensional drawings, applying transformations to geometric shapes in the coordinate plane, and using manipulatives to organize and interpret data. Students will verify and apply the Pythagorean Theorem and represent relations and functions using tables, graphs, and rules. Students enrolled in this course will take the Grade 8 Mathematics SOL Test.

Algebra Readiness (3131)—1 elective credit

This course is designed for students who wish to enroll in Algebra 1, but require an extension of skills and understanding of concepts in the real number system. Students will solve first-degree equations and inequalities and perform operations with polynomials. Functions, relations, and their graphs are introduced. Manipulatives, graphing calculators, and application software are used for solving problems and verifying solutions.

Algebra I (3132) (semester) – 1 credit

(Prerequisite: Algebra Readiness)

In Algebra I, students continue the study of algebraic concepts including operations with real numbers and polynomials. They solve first-degree equations and inequalities, quadratic equations, and systems of equations. Concepts associated with functions and relations, including their graphs, are emphasized. A study of statistics is also included in this course. Manipulatives, graphing calculators, and application software are used for solving problems and verifying solutions. Students enrolled in this course will take the EOC Algebra I SOL.

Algebra I (3130) (Semester) – 1 credit

(Prerequisite: Math Teacher Recommendation)

In Algebra I, students continue the study of algebraic concepts including operations with real numbers and polynomials. They solve first-degree equations and inequalities, quadratic equations, and systems of equations. Concepts associated with functions and relations, including their graphs, are emphasized. A study of statistics is also included in this course. Manipulatives, graphing calculators, and application software are used for solving problems and verifying solutions. Students enrolled in this course will take the EOC Algebra I SOL.

Geometry Readiness (Semester) (3144) —1 elective credit

(Prerequisite: Algebra I)

This course is designed for students who wish to enroll in Geometry, but require an extension of skills and understanding of concepts needed for the deductive method of proof. Axioms are used to justify theorems and to determine whether conclusions are valid. A gradual development of formal proof is encouraged. A variety of applications and some general problem-solving techniques are used to implement these concepts. Students use graphing utilities and computer software as appropriate.

Geometry (Semester) (3145) – 1 credit

(Prerequisite: Geometry Readiness)

This course includes the deductive axiomatic method of proof to justify theorems and to tell whether conclusions are valid. It also includes emphasis on two- and three-dimensional reasoning skills, coordinate and transformational geometry, and the use of geometric models to solve problems. Students use graphing utilities and computer software as appropriate. Students enrolled in this course will take the EOC Geometry SOL.

Geometry (Semester) (3143) – 1 credit
(Prerequisite: Recommended “C” average in Algebra I and/ or teacher recommendation.)

This course includes the deductive axiomatic method of proof to justify theorems and to tell whether conclusions are valid. It also includes emphasis on two- and three-dimensional reasoning skills, coordinate and transformational geometry, and the use of geometric models to solve problems. Students use graphing utilities and computer software as appropriate. Students enrolled in this course will take the EOC Geometry SOL.

Algebra Functions and Data Analysis (3134) —1 credit
(Prerequisite: Algebra I and Geometry)

This course is designed for students who have successfully completed the standards for Algebra I. Within the context of mathematical modeling and data analysis, students will study functions and their behaviors, system of inequalities, probability, experimental design and implementation, and analysis of data. Data will be generated by practical applications arising from science, business, and finance. Students will solve problems that require formulation of linear, quadratic, exponential, or logarithmic equations or a system of equations.

Algebra II (3135) – 1 credit
(Prerequisite: Algebra I and Geometry; Recommendation of a “C” in Algebra I; Offered in Grades 10-12)

A thorough treatment of advanced algebraic concepts is provided through the study of functions, polynomials, rational expressions, complex numbers, and sequences and series. Oral and written communication concerning the language of algebra, the logic of procedures, and interpretation of results also permeate the course. A transformational approach to graphing functions is used. Students vary the coefficients and constants of an equation, observe the changes in the graph of the equation, and make generalizations that can be applied to many graphs. Students enrolled in this course will take the EOC Algebra II SOL.

Trigonometry (3150A) – 1 credit
(Prerequisite: Algebra II; Recommendation of a “C” In Algebra II)

Trigonometric and circular functions are introduced in this course. Evaluation of trigonometric functions, use of basic formulas, and laws of cosines and sines are presented. Emphasis is placed on the applications of trigonometry, solutions of trigonometric equations, applications of triangles and vectors, and polar graphing. Advanced topics in algebra, analytical geometry, polynomial functions, and sequences are also included.

Math Analysis/Pre-Calculus (Honors) (3162H) (D-Squared) – 1 credit (Prerequisites: Trigonometry; Passing score on a placement test administered by Patrick Henry Community College. Students will earn 4 college credits for MTH).

Students enrolled in Mathematical Analysis are assumed to have mastered Algebra II concepts and have some exposure to trigonometry. Mathematical Analysis develops students’ understanding of algebraic and transcendental functions, parametric and polar equations, sequences and series, and vectors. The content of this course serves as appropriate preparation for a calculus course.

Calculus (Honors) (3177H) (D-Squared) – 1 credit (Prerequisites: Math Analysis; Passing score on a placement test administered by Patrick Henry Community College. Students will earn 6 college credits for MTH 175-176.)

This course extends the theory of elementary functions. Topics include: derivatives of algebraic functions, and transcendental functions; derivatives of the sum, difference, product, quotient and power of algebraic/ transcendental functions; the definite integral and improper integrals and concepts related to integration; logarithmic differentiation; techniques of integration; differential equations, and applications of the derivative and the definite integral. Both applications and formal proof are emphasized.

SCIENCE

For courses in Biology I, Biology H, and Biology II—Human Anatomy and Physiology: With regard to State regulations and respect to individual differences, alternatives to dissection can be made available to individuals with special circumstances. Any objection to dissection should be substantiated by a written request and signed by the student’s parent, administrator, and possibly physician. Documentation will then be placed in the student’s records.

Physical Science (4125) (Prerequisite: None)

The physical science course stresses an in-depth understanding of the nature and structure of matter and the characteristics of energy. The standards place considerable emphasis on the scientific inquiry of physical science principles. Major areas covered by the standards include the organization and use of the periodic table, physical and chemical changes, nuclear reactions, temperature and heat, sound, light, electricity and magnetism, work, force, and motion, and lab equipment. Students enrolled in this course will take the Grade 8 Physical Science SOL.

Earth Science (4210) – 1 credit
(Prerequisite: None)

The Earth Science standards connect the study of the Earth's composition, structure, processes, and history; its atmosphere, fresh water, and oceans; and its environment in space. The standards emphasize historical contributions in the development of scientific thought about the Earth and space. The standards stress the interpretation of maps, charts, tables, and profiles; the use of technology to collect, analyze, and report data; and science skills to perform systematic investigation. Problem solving and decision-making are an integral part of the standards, especially as they relate to the costs and benefits of utilizing the Earth's resources. Major topics of study include plate tectonics, the rock cycle, Earth history, the oceans, the atmosphere, weather and climate, and the solar system and universe. Students enrolled in this course will take the EOC Earth Science SOL.

Earth Science Advanced (4210A) – 1 credit
(Prerequisite: Completion of both Algebra I and Physical Science with a recommended minimum "C" grade average)

This rigorous Earth Science course connects the study of the Earth's composition, structure, processes, and history; its atmosphere, fresh water, and oceans; and its environment in space. The standards emphasize historical contributions in the development of scientific thought about the Earth and space. The standards stress the interpretation of maps, charts, tables, and profiles; the use of technology to collect, analyze, and report data; and science skills to perform systematic investigation. Problem solving and decision-making are an integral part of the standards, especially as they relate to the costs and benefits of utilizing the Earth's resources. Major topics of study include plate tectonics, the rock cycle, Earth history, the oceans, the atmosphere, weather and climate, and the solar system and universe. Students enrolled in this course will take the EOC Earth Science SOL.

Biology (4310) – 1 credit (Prerequisite: Earth Science)

The standards of Biology are designed to provide students with a detailed understanding of living systems. Emphasis continues to be placed on the skills necessary to examine alternative scientific explanations, actively conduct controlled experiments, analyze and communicate information, and acquire and use scientific literature. The history of biological thought and the evidence that support it are explored and provide the foundation for investigating biochemical life processes, cellular organization, mechanisms of inheritance, dynamic relationships among organisms, and the changes in organisms through time. The importance of scientific research that validates or challenges ideas is emphasized at this level. Students enrolled in this course will take the EOC Biology SOL.

Advanced Biology (4310A)
(Prerequisite: Completion of Earth Science with a minimum of "C" average)

This course is designed to give students a more challenging and in-depth Biology experience while also following the Virginia Standards of Learning in Biology. Students are expected to work independently on a variety of assignments and accept greater responsibility for their learning. Students are expected to design and carry out several independent investigations of biological questions; read and report on recent research in biology, and demonstrate a more in-depth conceptual understanding of all Biology objectives. Students enrolled in this course will take the EOC Biology SOL.

Biology (Honors) (4320H) (D-Squared) – 1 credit
(Prerequisites: Biology I; Chemistry; Passing score on a placement test administered by Patrick Henry Community College. Students will receive 8 college credits for BIO 101 and 102.)

This course is an intensive study of modern biology, taught at the college level. Course content provides in-depth coverage of molecular biology, genetics, cellular biology, embryology, plant and animal physiology, and human anatomy and physiology. Experience will be provided in special techniques and laboratory materials and equipment used in modern biological research.

Biology II: Human Anatomy and Physiology (4330) - 1 credit
(Prerequisites: Recommended "C" in Biology)

Biology II is a course designed to present the student with essential information for understanding structure and function of the human body as well as promoting an interest in health careers. Dissection of mammals is required as well as the use of visual aids.

Biology II: Ecology (4340) - 1 credit (Prerequisites: Biology)

This course introduces students to global issues, including loss of habitats, global warming and its projected effects, world hunger, and the extinction of species. Students will explore factors influencing human population growth and changing biomes, and potential threats to ecosystems.

Anatomy & Physiology (Honors) (4330H) – 2Credits/Yearlong
(Prerequisites: Biology I; Chemistry; Passing score on a placement test administered by Patrick Henry Community College. Students must take as dual enrollment and must meet the DE requirements. Students will receive 8 college credits for BIO 231 and 232)

This course integrates anatomy and physiology of cells, tissues, organs, and systems of the human body. Integrates concepts of chemistry, physics, and pathology. This course is designed for general studies/health science students. The purpose of this course is to introduce students to the study of the anatomy and physiology of the human body. This course will provide students a solid foundation of the various different structural and functional components of the human body. This will be satisfied by studying anatomical parts, as well as the physiological processes of the human body through the study of body systems. Each system is presented in sufficient depth to provide a comprehensive understanding for students. The systems that will be of main focus in this course include the integumentary, skeletal, muscular, and nervous. Other topics discussed in this course include anatomical terminology and tissues.

Chemistry (4410) – 1 credit
(Prerequisite: Biology; Algebra II)

The Chemistry standards are designed to provide students with a detailed understanding of the interaction of matter and energy. This interaction is investigated through the use of laboratory techniques, manipulation of chemical quantities, and problem-solving applications. Scientific methodology will be employed in experimental and analytical investigations, and concepts will be illustrated with practical applications. Student enrolled in this course will take the EOC Chemistry SOL.

Chemistry (Advanced) (4410A) – 1 credit
(Prerequisite: Biology; Algebra II)

In Advanced Chemistry, concepts introduced are extended and higher levels of subject matter and scientific investigations are explored. Laboratory techniques are refined and expanded with emphasis placed on the study of descriptive chemistry and chemical principles through the use of chemical models. Importance is placed on the student's development of a strong problem-solving orientation to chemistry. Students enrolled in this course will take the EOC Chemistry SOL.

Physics (4510) – 1 credit (Prerequisite: Biology; Algebra II)

The Physics standards emphasize a more complex understanding of experimentation, the analysis of data, and the use of reasoning and logic to evaluate evidence. The use of mathematics, including algebra, inferential statistics, and trigonometry, is important, but conceptual understanding of physical systems remains a primary focus. Students build on physical science principles by exploring, in depth, the nature of characteristics of energy and its dynamic interaction with matter. Key areas covered by the standards include force and motion, kinetic molecular theory, energy transformations, wave phenomena and the electromagnetic spectrum, light, electricity fields, and non-Newton physics. The standards stress the practical application of physics in other areas of science and technology and how physics affects our world.

Forensic Science (4612) – 1 credit
(Offered in Grades 11 and 12)

This course is designed to introduce students to various aspects of science and how they relate to the law. The main focus of this course will be techniques used during crime scene investigations. Topics will include fingerprinting, collection of evidence, processing evidence, documentation of evidence and crime scenes through sketches and photography, questioned documents, trace evidence, firearms and tool marks, etc. Principles of criminal law and procedure, preparation and presentation of evidence, examination of witnesses, methods of legal research and procedural rules affecting the collection and use of physical evidence will also be discussed. Students will apply their knowledge to laboratory assignments, simulation crime scenes and mock trials.

HISTORY / SOCIAL SCIENCES

World History & Geography to 1500 A.D. (CE) (2215) – 1 credit
(Prerequisite: None)

This course enables students to explore the historical development of people, places, and patterns of life from the Paleolithic Age until about 1500 A.D. (CE). Students study the origins of much of our heritage using texts, maps, pictures, stories, diagrams, charts, chronological skills, inquiry/research skills, and technology skills. Student enrolled in this course will take the EOC World History I SOL.

World History & Geography 1500 A.D. (CE) to the Present (2216) – 1 credit (Prerequisite: None)

This course covers history and geography from 1500 A.D. to the present with emphasis on Western Europe. Geographic influences on history continue to be explored, but increasing attention is given to political boundaries that developed with the evolution of nation-states.

Significant attention will be given to the ways in which scientific and technological revolutions created new economic conditions that in turn produced social and political changes. The people and events of the nineteenth and twentieth centuries will be emphasized for their strong connections to contemporary issues. The course covers broad themes of history with emphasis on specific historic events, ideas, issues, persons, and documents. Using texts, maps, pictures, stories, diagrams, charts, and a variety of chronological, inquiry/research, and technology skills, students develop competence in chronological thinking, historical comprehension, and historical analysis. Students enrolled in this course will take the EOC World History II SOL.

World Geography (2210) – 1 credit
(Prerequisite: Offered in Grades 9-12)

The focus of this course is the study of the world's people, places, and environments with historical emphasis on Asia, Latin America, Africa, and the Middle East. The knowledge, skills, and perspectives of the course are centered on the world's population and cultural characteristics, its countries and regions, landforms and climates, natural resources, and natural hazards, economic and political systems, and migration and settlement patterns. Spatial concepts of geography will be linked to chronological concepts of history to set a framework for studying human interactions. The course will emphasize how people in various cultures influence and are influenced by their physical and ecological environments. Using texts, maps, globes, graphs, pictures, diagrams, charts, and a variety of geographic, inquiry/research, and technology skills, students consider the relationships between people and places while asking and answering geographic questions. Students enrolled in this course will take the EOC World Geography SOL.

VA and United States History (2360) – 1 credit
(Prerequisite: Offered in Grade 11)

This course covers the historical development of American ideas and institutions from the Age of Exploration to the present. While focusing on political and economic history, the students will develop a basic knowledge of American culture through a chronological survey of major issues, movements, people, and events in United States and Virginia history. Students enrolled in this course will take the EOC VA & US History SOL.

VA and United States History (Honors) (2360H) (D-Squared) – 1 credit (Prerequisites: Offered in Grade 11, Recommended "C" average in World History II or World Geography; passing score on a placement test administered by Patrick Henry Community College. Students will receive six college credits for HIS 121 and HIS 122.)

The focus of this course is on the major themes, events, and ideas that shaped the history of the United States. Students probe, in depth, the dynamics of American political and diplomatic decision-making, national and sectional interests, and a variety of personalities and social movements related to the development of the United States. Distinguishing characteristics of cultures are examined through literature, art, architecture, music, religion, philosophy and geography. Students will be required to write thoughtful and factually supported papers on historical topics. Students enrolled in this course will take the EOC VA & US History SOL.

VA & United States Government (2440) – 1 credit
(Prerequisite: Offered in Grade 12)

The focus of this course is on the major themes, events, and ideas that shaped the history of the United States. Students probe, in depth, the dynamics of American political and diplomatic decision-making, national and sectional interests, and a variety of personalities and social movements related to the development of the United States. Distinguishing characteristics of cultures are examined through literature, art, architecture, music, religion, philosophy and geography. Students will be required to write thoughtful and factually supported papers on historical topics. In addition, students will study a unit in financial literacy.

Virginia and United States Government (Honors) (2440H) (D-Squared) – 1 credit
(Prerequisites: Offered in Grade 12; Recommended “C” average in regular US History course or passing grade in US History Honors course; passing score on a placement test administered by Patrick Henry Community College. Students will receive six college credits for PLS 211 and PLS 212.)

This course provides students with challenging assignments in reading, analysis, synthesis, writing, and speaking. Students examine the principles and practices of government, particularly of American government, at national, state, and local levels. The framework for this course includes units on the development of the theories of government, law and the justice system, and current domestic and foreign policy. Students will be required to differentiate among the operations of each of the levels of the United States government.

20th Century History (2387) – 1 credit
(Prerequisite: Offered in Grades 9-12)

This course focuses on the events, times and individuals that helped shape the United States during the twentieth century. It is designed to provide an in-depth exploration of special topics that may be covered in a United States history survey course. Students will explore United States history throughout the twentieth century using several types of learning methods that include independent and group research projects. Classroom projects include working collaboratively collecting data. Students use technology to research and communicate information in video or audio format. This class allows students to become exposed to the standards from the World History II and VA & US History SOL's before they enroll in one of those courses.

Economics (2800) – 1 credit
(Prerequisite: Offered in Grades 10-12 only)

This course provides students with an introduction to fundamental macro and micro economics principles include scarcity, supply and demand, and pricing. The student will learn about the free-market system, the role of labor and government, the Federal Reserve System, the role of the US in the global economy and economic problems facing our modern world.

Sociology (2500) – 1 credit
(Prerequisite: None; Offered in Grades 10-12)

Sociology is a science dealing with human relationships and problems of society. The course aids students in gaining insight into their own social relationships and environment. Included in the course content are the study of culture, social groups, deviant and collective behavior, American class structure, minorities, population, ecology, and social

institutions (family, education, religion, economics, and government). The application of sociology to social problems such as rural and urban problems, crime and juvenile delinquency, poverty, and youth problems is studied.

Psychology (2900) – 1 credit
(Prerequisite: Offered in Grades 10-12)

Providing a broad, general introduction to psychology, this course emphasizes how the basic subject matter of psychology has been attained by scientific methods. This course examines patterns and variations of human behavior and the process of human development. Students will study how psychological knowledge is applied to improve the quality of life.

PERSONAL FINANCE

An Economics and Personal Finance course will be required for graduation beginning with the freshman class of 2011-2012 and beyond.

Economics and Personal Finance (6120)—1 credit
(Prerequisite: None) (Offered in Grades 10)

Students learn how to navigate the financial decisions they must face and to make informed decisions related to career exploration, budgeting, banking, credit, insurance, spending, taxes, saving, investing, buying/leasing a vehicle, living independently, and inheritance. Development of financial literacy skills and an understanding of economic principles will provide the basis for responsible citizenship and career success. In addition to developing personal finance skills, students in the 36-week course will also study basic occupational skills and concepts in preparation for entry-level employment in the field of finance. The course incorporates all economics and financial literacy objectives included in the *Code of Virginia* §22.1-200-03B.

FINE ARTS

ART

Art I: Art Foundations (9120) – 1 credit (Prerequisite: None)

Art Foundations emphasizes the development of abilities to recognize visual arts content, concepts, and skills to create, discuss, and understand original works of art. The standards represent a thematic approach to visual communication and production, cultural context and art history, judgment and criticism and aesthetics through which students will develop understanding and appreciation for the visual arts. At this level, studio production involves beginning experiences utilizing a variety of media.

Art II: Intermediate (9130) – 1 credit
(Prerequisite: Art I: Art Foundations)

This course extends and refines abilities to investigate and respond to the visual arts. The standards emphasize the importance of content, concepts, and skills involved in the creation of original works of art. The standards introduce a chronological approach to visual communication and production, cultural context and art history, judgment and criticism, and aesthetics that enhance student understanding of the ways in which art functions within a multicultural society. Areas covered are drawing, painting, sculpture, pottery, printing and various crafts. Students are encouraged to develop self-expression through their individual works.

Art III: Advanced Intermediate (9140) – 1 credit
(Prerequisite: Art II: Intermediate)

Advanced Intermediate Art continues the emphasis on development of abilities to organize and analyze visual arts content, concepts, and skills in creating works of art. The focus on art history, critical evaluation and aesthetics is increased, and includes cultural and stylistic issues and creative problem solving. At the advanced level, previous understandings and skills are further emphasized and developed while the students are allowed and encouraged to pursue individual projects and to plan and execute creative products by using a variety of techniques and visual concepts.

Art IV: Advanced (9145) – 1 credit
(Prerequisite: Art III: Advanced Intermediate)

Advanced Art reinforces competence and confidence in skills of analysis evaluation, and creation of works of art. Content and concepts associated with art criticism and aesthetics are central to the refinement of art production skills, and the student-directed approach at this level richly enhances personal expressive abilities. Visual communication and production, cultural context and art history, judgment and criticism, and aesthetics remain the foundation areas of standards. Students pursue independent projects that allow them to expand their unique talents and interests. Students conduct research that is related to their studio production and are given opportunities to exhibit and develop portfolios for college or employment review.

Art V: Studio Art (9147) – 1 credit
(Prerequisite: Art IV: Advanced)

Studio art is a course for advanced art students who want to study areas of art in depth. There is a continued emphasis upon aesthetic knowledge, visual problem-solving, creative growth, and the use of media skills for personal expression. Students are allowed more time for pursuing individual projects, for exploration of art media and techniques, and for developing art skills. The students are allowed to choose areas in which they want to work. Along with the teacher, the student chooses media and subject matter. This may include any area of art such as sculpture, painting, graphics, drawing or crafts. This course may be taken more than once for further knowledge and experience.

MUSIC

General Music Grade 8/Beginning Band (Year) (9213)
(Prerequisite: Enrolled in Elementary Band)

Developing basic musicianship skills are a priority at the eighth grade level. Students will begin to use articulations, and perform scales and music at a more difficult level. Ensemble skills will become more developed as students participate in band and concert settings. Students will describe concepts common to music and other disciplines, and will be involved in discussing various cultures, styles, composers, and historical periods. After-school opportunities will be available for such activities as All District Band and small group ensembles. Participation in public performances is required, as is uniform dress.

Marching Band I—IV (9232, 9233, 9234, 9244) - 1 credit each
(Prerequisite: Offered in Grades 9-12, (Fall Semester)
Elementary Band or Beginning Band)

Marching Band is an in-depth study of instrumental music. Music designed and composed for band will be explored. Emphasis is placed upon the student's ability to play the instrument. The class will learn

marching techniques and will perform at football games, marching competitions and parades, holiday concerts and other public performances. Theory, technique, style and musicality will be stressed in the preparation and performance of all genres of music. Students enrolled in Marching Band will be issued a uniform. Students will assume responsibility for proper care and condition of the uniform. Students will also be required to purchase black marching shoes, black cotton gloves, and a "Marching Cougar Shirt." Marching band is a performance-based class; therefore attendance at all functions is required. Attendance at Summer Band Camp is mandatory.

Note: Participation in the band is recommended both semesters unless the band director grants special permission. Exceptions will be reviewed and accommodated on an individual basis when possible.

Flag Corp I—IV (93211, 9323, 9325, 9319) - 1 credit
each (Prerequisites: Offered in Grades 9-12 (Fall Semester) -
Audition Required)

Flag Corp is an extension of the Marching Band. Students are responsible for all costs of uniforms and band camp, and are required to attend summer band camp. An intense weekly rehearsal schedule (including after school practice), football games, frequent band performances, weekend competitions, and participation in all band trips are mandatory during the semester. Grading is based upon performance in competitions and football games, as well as practices. Individual performances, skills and attitudes demonstrated in rehearsal and performances will also be considered in grading.

Concert Band I—IV (9237, 9238, 9239, 9242) - 1 credit each
(Prerequisites: Offered in Grades 9-12 (Spring Semester)
Elementary Band or Beginning Band)

The Concert Band will investigate music from the Renaissance to Jazz and 20th Century styles. Emphasis will be placed on intonation, blend rhythm and dynamics. Students will be tested on the above standards through playing tests as well as written assignments. The group will perform for competitions, concerts, or other special events. Concert band is a performance-based class; therefore attendance at all functions is required.

Note: Participation in the band is recommended both semesters. Exceptions will be reviewed and accommodated on an individual basis when possible.

Concert Band III-IV Advanced (9239A, 9242A) – 1 credit each
(Prerequisites: Concert Band II; Marching Band III; teacher
recommendation)

This course will prove to be more rigorous than regular Concert Band III & IV. Students will follow the day to day curriculum of regular Concert Band, but will go a little deeper into the music curriculum. Students will learn and be able to perform the various forms of minor scales that correspond with the 12 major scales. Students in this course will be required to audition for All-District Band, Solo & Ensemble, All-Virginia Band & Orchestra and be a member of the basketball pep band.

Beginning Chorus 8 (9271) (Prerequisites: None)

This course is designed to introduce students to a study of choral music and prepare students for participation in Concert Choir and Honors Choir. Emphasis will be placed on vocal development, music theory and reading, and performance technique. Participation in public performance is required, as is uniform dress.

Concert Choir I—IV (9289, 92892, 92893, 92894) - 1 credit each (Prerequisites: Offered in Grades 9-12)

This course is designed to: a) introduce students to a study of choral music, b) prepare students for participation in Honors Choir, and c) provide an enjoyable method to expand the students' musical knowledge. This course will emphasize proper vocal technique, familiarity with basic music theory and learning about a wide variety of musical styles. Participation in public performances is required, as is a uniform dress. Concert choir is a performance-based class; therefore attendance at all functions is required.

Honors Choir I—IV (9296, 92962, 92963, 92964) 1 credit each (Prerequisites: Offered in Grades 9-12—Audition Required)

Honors Choir continues to develop the voice and proper vocal technique learned in Intermediate Choir or Concert Choir. Knowledge of music theory and sight-reading will be expanded. Participation in public performances is required, as is uniform dress. Students will be expected to be able to rehearse and perform after school hours on a limited base. Honors choir is a performance based class: therefore attendance at all functions is required. *Student will compete in different contests at the district, state, and national levels. Auditions will be required for participation in All- District Choir.*

DRAMA

Theatre Arts Exploration (Drama I) (1410) - 1 credit (Prerequisites: Offered in grades 8-12)

This course is an introduction to theatre arts through practical application. The course will include theater safety, stage etiquette, basics of sound and lighting design and application, improvisation, physical and vocal preparation, storytelling, theatrical history and acting techniques. Students will participate in an end-of-term demonstration of course skills presented in an after school setting.

Theatre Production (Drama II) (1430) - 1 credit (Prerequisites: Offered in grades 9—12, Theatre Arts Exploration)

This course continues to build on previous skills through practical application. Building on skills introduced in Drama I this course includes continuing studies in sound and lighting application, theatre history, jobs involved in play production, music, movement, direction and stage management. Evaluation of live production and motion pictures is included. Students will participate in an end-of-term demonstration of course skills presented in an after school setting.

Technical Theatre/Practical Theatre Applications (Drama III) (1435) - 1 credit (Prerequisites: Offered in Grades 9—12, Theatre Production).

This is an advanced elective course with an emphasis on directing, play writing and selecting, stage management and advanced acting projects. It is designed for those students who wish to pursue advanced techniques in drama and who may wish to pursue the study of theatre arts. Students will participate in an end-of-term demonstration of course skills presented in an after school setting.

Advanced Acting/Directing (Drama IV) (1426) - 1 credit (Prerequisites: Offered in grades 11-12, Drama III)

This course is designed for students who wish to pursue advanced techniques in drama, auditioning, technical theatre, rehearsal process and performance and who wish to continue this pursuit beyond high school. The fourth year student is expected to assimilate the acquired skills learned in Theatre I, II, and II and demonstrate practical knowledge through participation in the rehearsal/performance process. Students will participate in an end-of-term demonstration of course skills presented in an after school setting. Further involvement in extracurricular theatrical work is encouraged.

Directing/Advanced Theatre Studies (Drama V) (1440) – 1 credit (Prerequisites: All four previous levels and an interview with the instructor prior to acceptance; Offered in grades 11-12)

Drama V is designed to give students hands on experience in the direction of a one act play, stage management, lighting and sound design and all finishing aspects of a production. Including the skills learned in Theatre Arts I, II, III and IV, this course requires participation in an extra-curricular theatre production at PCHS under the supervision of the Theatre Arts instructor as well as end-of-term demonstration of course skills as noted in levels I-IV.

HEALTH AND PHYSICAL EDUCATION

Two units of health and physical education in sequence above the eighth grade level are required for graduation. Physical education is taught in conjunction with health in the eighth, ninth, and tenth grades.

Health and Physical Education 8 (7200) (Prerequisites: None) (Offered in Grade 8)

Students in grade eight demonstrate competence in skillful movement in modified, dynamic game situations and in a variety of dance and recreational activities. They will transition from modified versions of movement forms to more complex applications across all types of activities— game/sport, dance, and recreational pursuits.

Health and Physical Education 9 (7300) – 1 credit (Prerequisites: None)

In grade nine, students complete the transition from modified versions of movement forms to more complex applications across all types of physical activities. Activities may include games, sports, dances, and recreational pursuits. Students demonstrate the ability to use basic skills, strategies, and tactics as they show more specialized knowledge in identifying and applying key movement concepts and principles. Students develop and assess a personal physical activity program aimed at improving their skill performance. Students demonstrate the ability to plan and improve components of fitness to achieve and maintain a health-enhancing level of personal fitness. Health education may include information concerning alcohol and other drugs, consumer health, disease prevention and control, personal health, growth and wellness, mental health, nutrition, character education, and family life education.

Health and Physical Education 10 (7405) & Driver Education Classroom Instruction (7015) – 1 credit
(Prerequisites: Health & P.E. 9)

In grade 10, students are proficient in all fundamental movement skills. Students self-select physical activities that they are likely to participate in throughout life. Students understand and apply key movement and fitness principles and concepts for activities in which they demonstrate competence. Students develop the ability to understand and anticipate how physical activity interests and abilities change across a lifetime. Students must demonstrate a level of competency in at least three lifetime physical activities and implement, self-assess, and modify a personal fitness plan. Classroom instruction includes driver education and family life education. Classroom and in-car driver education focus on safe driving attitudes, time, space, and distance perception, skill development, and recognition of appropriate response to hazards in the ever-changing driving environment. Students apply basic driving skills in low-to-moderate traffic situations and progress to demonstration of skill proficiency in more complex traffic situations. Throughout the course, emphasis is placed on extensive supervised practice with a licensed parent or guardian to develop precision in the use of skills, processes, and responsibilities.

Advanced Physical Education I (7650) – 1 credit (Prerequisite: Recommended "C" in Health/PE 10; Offered in grades 11-12)

This course provides students opportunities to expand the scope of their skill in physical education to include officiating, coaching, and teaching. An additional goal is to foster lifetime fitness. Emphasis is placed on the five health-related components of fitness including cardiovascular fitness, muscular strength and endurance, flexibility, and body fat control. Individual fitness levels are assessed. Instruction includes emphasis on health risk factors related to lifestyles and how nutrition affects wellness. Activities include weight training and conditioning, fundamentals of coaching and teaching, and sport specific training. Throughout this course, student fitness levels will be monitored with the use of individual records that incorporate charts and graphs. This course is for elective credit.

Sport Training I (Sport, Exercise and Health Science) (7638) – 1 credit (Prerequisite: Offered in grades 9-12; recommended "C" in previous PE class)

This course is designed for the student-athlete and will introduce students to training techniques and exercises specific to each sport. Students will learn the basic fundamentals and terminology for strength and conditioning. Focus will be placed on the five core areas of fitness and the importance of weight training and conditioning for athletes will be emphasized. Students will learn to set fitness goals and be responsible for tracking their individual progress throughout the semester. This course is for elective credit.

Sport Training II (Advanced PE) (7640) – 1 credit (Prerequisite: Sport Training I; Offered in grades 10-12; recommended "C" in previous PE class)

This course is designed for the student-athlete and will expand the scope of their skill in specific sport training and conditioning. Students will continue to develop and improve in all five core fitness areas with focus on training specific to their individual sport. Students will continue to develop personal fitness goals and track progress throughout the class. Students will explore the importance of nutrition and the vital role it plays in an athlete's overall development and performance. Students will set personal nutritional goals and begin to create their own diet plans based on caloric needs. This course is for elective credit.

Sport Training III (PE Grade 11)(7510) – 1 credit (Prerequisite: Sport Training II; Offered in grades 11-12; recommended "C" in previous PE class)

This course is designed for the student-athlete and will expand the scope of their skills and knowledge of sports specific training. Students will continue to develop and improve proper lifting and training techniques, with a special focus on specific muscle groups. Students will continue to track progress and develop goals for the semester. Students will research and review different sports training techniques and learn to create workouts for themselves. A workout and diet plan developed by each student specifically for their own sport and fitness goals will be used to assess and check for student understanding. This course is for elective credit.

Sport Training IV (PE Grade 12) (7610) – 1 credit (Prerequisite: Sport Training III; Offered in grade 12; recommended "C" in previous PE class)

This course is designed specifically for the student-athlete and will expand the scope of their skills and knowledge of sport specific training. Students will master correct form and technique for specific lifting and training exercises. Each student will set specific goals, as well as develop a comprehensive sport specific training and diet plan to insure peak performance for the student-athlete. Students will be introduced to collegiate athletic training techniques to prepare students for college athletics and careers. Career paths in strength and conditioning as well as athletic training will be discussed. Students will develop life-long fitness goals to ensure healthy habits are maintained once the student has graduated. This course is for elective credit.

FOREIGN LANGUAGE

Note: Oral presentations are integrated throughout the foreign language curriculum in order to develop and promote oral fluency in the language. It is recommended that the student receive a "C" in the previous level of a foreign language prior to advancing to the next level of foreign language.

Spanish I (5510) – 1 credit (Prerequisites: Recommended "C" in English)

Spanish I is a study of the Spanish language, which gives primary emphasis to the oral aspects of the language, both understanding and speaking. Included in class activities are dialogues, oral and written exercises, study of basic grammatical structures, readings, singing, dancing, cultural films, projects, games, and daily conversations in Spanish. Oral presentations are done frequently and are a major part of the class grade.

Spanish II (5520) – 1 credit (Prerequisites: Recommended "C" in Spanish I)

The focus on Spanish II is on refining pronunciation and demonstrating a greater ability to communicate in Spanish. Included in classroom activities are dialogues, oral and written activities, study of more complicated grammatical structures, readings, singing, dancing, cultural films, projects, games, and a continuing emphasis on daily conversations.

Spanish III (Advanced) (5530A) —1 credit (Prerequisites: Recommended “C” in Spanish II; offered in Grades 10-12)

Spanish III is a continuous building of vocabulary and grammatical structures. Focus is on oral presentations and directed student interaction, e.g., dialogues, skits, discussions, interviews, and summaries. Students are expected to use Spanish almost exclusively in classroom conversation.

*Spanish IV (Honors) (5540H) 1 credit
(Prerequisites: Recommended “C” in Spanish III; offered in Grades 11-12; passing score on a placement test administered by Patrick Henry Community College. Students must take as dual enrollment and must meet DE requirements. Students will earn 8 college credits for SPA 101 and SPA 102)*

Spanish IV is a continuous building of vocabulary and grammatical structures through conversations, readings, and writings in the language. Students are expected to make acceptable and exclusive use of Spanish in classroom communication.

*Spanish V (Honors) (5550H) —1 credit
(Prerequisites: Recommended “C” in Spanish IV; passing score on a placement test administered by Patrick Henry Community College. Students must take as dual enrollment and must meet DE requirements. Students will earn 8 college credits for SPA 201 and SPA 202 Students may be eligible to take the AP Exam upon successful completion of this course.)*

Spanish V is designed to increase the student’s ability to comprehend and to use formal and informal spoken Spanish. Students are required to use Spanish exclusively in classroom communication. Course content includes formal and informal oral presentations, advanced grammar, short stories, Hispanic civilization and culture and the study of selected Spanish literary classics. Practice for the Advanced Placement Spanish Language Exam is given at various times during the course.

ENGLISH LANGUAGE LEARNERS

*English as a Second Language I—IV (5710, 5720, 5730, 5731)-
1 credit each (Prerequisites—LEP Plan)*

This progression of courses is designed for the non-English speaking student or the Limited English Proficiency learner. These courses include vocabulary in context and provide practice, exercises in the basic skills necessary for success with particular emphasis in academic subjects. Students may enroll in these classes each year until they have achieved basic fluency in English. Some instruction in the native language is also provided.

CAREER & TECHNICAL EDUCATION

PCHS Career and Technical Education (CTE) programs serve approximately 1600 students each year. Career and Technical Education (CTE) courses give students the opportunity to apply academic knowledge and skills to real world issues. A variety of career and technical programs are offered to all students at the high school level. Regardless of post-secondary goals, all students can benefit from taking these courses. In addition, students that complete CTE programs have the opportunity to earn industry-recognized credentials that will give them a competitive advantage in their future endeavors.

For more information about becoming a CTE completer or about the testing provided, please contact your school counselor.

Career and Technical Education Definitions:

A **concentration** is a coherent sequence of state-approved courses as identified in the course listings within the Web-based Administrative Planning Guide (APG).

A career and technical education **completer** is a student who has met the requirements for a career and technical concentration (sequence) and all requirements for high school graduation or an approved alternative education program. Students may take additional career and technical education courses that will enhance their career pathway goals.

A **specialization** is a student choice to take additional courses beyond a minimum completer course sequence in a specific career cluster area related to his/her career pathway.

A **credential** is defined as:

- State-Issued Professional License, required for entry into a specific occupation as determined by a Virginia state licensing agency (LPN, Cosmetology);
- Full Industry Certification, from a recognized industry, trade, or professional association validating essential skills of a particular occupation (Microsoft Certified Professional);
- Pathway Industry Certification, which may consist of entry-level exams as a component of a suite of exams in an industry certification program leading toward full certification (Automotive Service Excellence); or
- Occupational competency assessment, a national standardized assessment of skills/knowledge in a specific career and/or technical area, (NOCTI).

Beginning with students entering ninth grade for the first time in 2013-2014, a student must also:

- Earn a board-approved career and technical education credential to graduate with a Standard Diploma; and
- Successfully complete one virtual course, which may be non-credit bearing.

The school counselor can advise on available courses to fulfill the requirements.

Education for Employment

A student may be designated a program completer by combining Education for Employment courses with other career and technical programs/courses that complement his/her career objectives as specified in the IEP for students with disabilities.

Sequential Electives

Sequential electives are defined as two or more courses of study in a focused sequence of elective courses.

Career Concentration

A Career Concentration is a coherent sequence of courses completed by a student in a specific career area.

CERTIFICATIONS, LICENSES & ASSESSMENTS

Beginning with the graduating class of 2017 all students earning a standard diploma **MUST** pass a state approved industry certification to graduate. Multiple courses offer end of course certifications to students at no charge including Economics & Personal Finance, a course all students are required to take and pass. Additional Virginia State approved Industry Certifications could be added throughout the year.

Available Certifications:

All CTE Courses—*Workplace Readiness Skills for the Commonwealth*

Health & Medical Sciences—*Virginia Board of Nursing Nurse Aide Certificate*

Auto Technology—*Automotive Service Excellence Student Certificate*

Cosmetology—*Virginia Board of Barbers and Cosmetology State Cosmetology License*

Culinary Arts – *National Restaurant Association ServSafe Manager Certification*

Military Sciences- *The Armed Services Vocational Aptitude Battery (ASVAB)*

Economics & Personal Finance- *W!SE Financial Literacy*

CAREER & TECHNICAL EDUCATION

Cooperative Education

Cooperative education is a method of instruction that combines Career and Technical classroom instruction with paid employment directly related to the classroom instruction. Both student instruction and employment are planned and supervised by the school and the employer so that each contributes to the student's career objectives and employability. Students may Co-op in any of the following areas: Agriculture Education; Business and Information Technology; Career Connections; Family and Consumer Sciences; Health and Medical Sciences; Marketing; Trade and Industrial Education. Students interested in cooperative education need to register for a Career and Technical class from the areas listed above, fill out a Co-op education application, and the job must be approved by the Co-op coordinator or CTE director prior to end of school year preceding enrollment. A student will be removed from the program if any violations of the agreement occur and placed in a class based on availability.

CAREER & TECHNICAL EDUCATION

AGRICULTURE

Introduction to Plant Systems (8007)-1 credit
(Prerequisites: Offered in Grades 8-10)

Students develop competencies in each of the major areas of the Plant Systems career pathway, including applied botany, plant propagation, and plant care and selection. Instructional content also includes an introduction to the various divisions of the plant systems industry. Students learn agricultural mechanics applicable to plant systems. As with all agriculture courses, students will be exposed to the principles of leadership and opportunities within student organizations, along with Supervised Agricultural Experience opportunities.

Introduction to Animal Systems (8008) -1 credit
(Prerequisites: Offered in Grades: 8-12)

Students develop competencies in each of the major areas of the Animal Systems career pathway including animal nutrition, reproduction, breeding, care, and management. Students learn agricultural mechanics applicable to animal systems. As with all agriculture courses, students will be exposed to principles of leadership and opportunities within student organizations along with Supervised Agricultural Experience opportunities.

Agricultural Production Management (8012)-1 credit
(Prerequisites: Offered in Grades 11-12)

Course includes instruction in agricultural mechanics, with emphasis placed on the application of mechanical skills to farm power and machinery, soil and water management, supervised farming programs, and leadership training.

Agricultural Fabrication & Emerging Technologies (8019)-1 credit
(Prerequisites: Offered in Grades 10-12)

Students will receive instruction in metal fabrication, including cutting, welding, and cold metalworking processes, for agricultural applications. The course will also include the investigation of emerging technologies used within the field of agriculture. Leadership and career skills will be incorporated throughout.

Small Animal Care I (8083)- 1 credit
(Prerequisites: Offered in Grades 9-12)

Students learn how to care for and manage small animals, focusing on instructional areas in animal health, nutrition, management, reproduction, and evaluation. Course content also includes instruction in the tools, equipment, and facilities for small animal care, and provides activities to foster leadership development. FFA and SAE activities are encouraged.

HORTICULTURE

Horticulture Sciences (8034) – 1 credit
(Prerequisites: Offered in grades: 9-12)

Through laboratory activities, students apply scientific principles to the field of horticulture, including the areas of floriculture, landscape design, greenhouse operation, nursery plant production, and turf management. They practice safety, develop leadership traits, use plant-growing media, and identify, propagate, and grow horticultural plants in the greenhouse and land laboratory.

Floriculture (8038) -1 credit
(Prerequisites: Offered in grades: 10-12, Horticulture Sciences)

Students learn the basics of the horticulture plant production industry. Instruction includes the science of plant production as well as marketing and business management. Plant material identification and floral design round out this course to prepare the student for an entry-level position in the floriculture industry. Participation in FFA activities provides leadership development opportunities.

Landscaping I (8036) – 1 credit
(Prerequisite: Offered in grades: 11-12, Horticulture Sciences)

Landscaping offers skilled workers satisfying career opportunities in varying working environments. The expanding and evolving green industry keeps skilled workers in high-demand occupations with educational and leadership opportunities. This course focuses on preparing students for entry-level employment and advancement in landscape design, landscape construction, and landscape maintenance.

Landscaping II – (8039)-1 credit (Prerequisite: Offered in Grades: 11- 12 Landscaping I)

Landscaping offers skilled workers satisfying career opportunities in varying working environments. The expanding and evolving green industry keeps skilled workers in high-demand occupations that feature educational and leadership opportunities. This course focuses on preparing students for entry-level employment in commercial landscaping through hands-on experiences. Students will design landscapes and install components, including lighting, hardscapes, and water features within an environment of the landscaping business enterprise.

Greenhouse Plant Production and Management (8035)- 1 credit
(Prerequisite: Offered in Grades: 10-12, Horticulture Sciences)

Students are taught the operating procedures for a greenhouse. Units of instruction include developing plant production facilities, science application in plant production, and identification of plants. Business management, leadership development, and marketing skills are emphasized to prepare students for careers in the greenhouse plant production and management industry.

Floral Design I (8055) - 1 credit
(Prerequisite: Offered in Grades: 10-12, Horticulture Sciences)

This course offers an expanded study of floral design, which was begun in the Horticulture Sciences course. Course content covers career opportunities, floral design foundations, design applications, and the marketing of floral products. Specific design styles to be examined include mass, mass-line, line, vase, wedding, balloon, holiday, and personal-adornment arrangements. The course also emphasizes leadership activities and opportunities to participate in FFA events.

CAREER & TECHNICAL EDUCATION

Floral Design II (8056) – 1 credit—(Prerequisite: Offered in grades: 11-12, Floral Design I)

Course content covers a wide range of specialty floral designs, including historical designs, contemporary designs, oriental designs, seasonal designs, floragraphy, and designs for dried arrangements, novelty pieces, special events, and sympathy work. The business aspect of the industry is addressed through the study of pricing, advertising, shop design, wire services, delivery processes, professional organizations, sales techniques, and continuing education. The course emphasizes leadership activities and opportunities to participate in FFA events.

*Turfgrass Establishment and Maintenance (8051) -1 credit
(Prerequisite: Offered in Grades: 10-12 Horticulture Sciences)*

Students begin to master the duties and tasks of professionals who establish and maintain turf in public areas such as golf courses; parks; athletic fields; school, industrial, and institutional campuses; and residential lawns.

*Turfgrass Applications Advanced (8054) 1 credit—
(Prerequisite: Offered in Grades: 11-12, Turf Establishment and Maintenance)*

Students continue to study the duties and tasks of professionals who establish and maintain turf in public areas such as golf courses; parks; athletic fields; school, industrial, and institutional campuses; and residential lawns.

AGRICULTURE AND HORTICULTURE CO-OP'S

Agriculture Cooperative Work Experience – (C-Semester; Y-Yearlong. (Offered in Grade 12) Must be enrolled in an Agriculture Education class first or second semester.

A Co-op student is required to work a minimum of 396 hours for one credit and 540 hours for two credits each semester. On-the-job training will take place during school, after school and on weekends both 1st and 2nd semester. Co-op employees receive training, money, and school credit for completing both the class work and on-the-job training. *The student* is responsible for obtaining a school-approved position and will need to fill out a coop education application. *The student* is also responsible for maintaining monthly hours and wage logs and must submit them to the Co-op coordinator. The job must be approved by teacher and the CTE director prior to end of school year preceding enrollment. The student must meet with the Co-op coordinator before any change in employment can occur during the school year. A student will be removed from the program and will not receive credit for Co-op if they fail the directly related class. Also, a student will be removed from the program if any violations of the agreement occur and will be placed in a class based on availability. Students who register for Agriculture Co-op must be enrolled in one of the following during the school year: Agricultural Production Management (8012); Agricultural Fabrication & Emerging Technologies (8019); Small Animal Care (8083); Floriculture (8038); Greenhouse Plant Production and Management (8035); Floral Design I(8055); Floral Design II (8056); Landscaping I (8036); Landscaping II (8039); Turf Establishment and Maintenance (8051); and Advanced Turf Grass Applications (8054).

BUSINESS AND INFORMATION TECHNOLOGY

*Computer Applications (6611) -1 credit
(Prerequisites: Offered in Grade 8)*

Students develop or review correct keyboarding techniques and gain a basic knowledge of word processing, spreadsheet, database, graphics, and telecommunications applications. Students demonstrate an understanding of computer concepts through application of knowledge. Students learn to use software packages and local and worldwide network communications systems. Grade 8 Computer/Technology Standards of Learning are incorporated and reinforced in this course.

*Principles of Business and Marketing (6115) - 1 credit
(Prerequisites: Offered in Grades 8-12)*

Students discover the roles of business and marketing in the free enterprise system and the global economy. Basic financial concepts of banking, insurance, credit, inheritance, taxation, and investments are investigated to provide a strong background as students prepare to make sound decisions as consumers, wage earners, and citizens. The real-world impact of technology, effective communication, and interpersonal skills is evident throughout the course. This course also supports career development skills and explores career options.

*Business Management (6135) - 1 credit
(Prerequisites: Offered in Grades 9-12)*

Students study basic management concepts and leadership styles as they explore business ownership, planning, operations, marketing, finance, economics, communications, the global marketplace, and human relations. Quality concepts, project management, problem solving, and ethical decision making are an integral part of the course. Student leadership skills may be enhanced by participation in school-based or virtual enterprises, job shadowing, internships, cooperative education, and/or the Future Business Leaders of America (FBLA).

*Design, Multimedia and Web Technologies (6630) – 1 credit
(Prerequisites: Offered in Grades 10-12)*

Students develop proficiency in designing and creating desktop-published projects, multimedia presentations/projects, and Web sites, using industry-standard application software. Students apply principles of layout and design in completing projects. Students create portfolios that include a résumé and a variety of desktop-published, multimedia, and Web-site projects produced in the course.

*Office Administration (6621) - 1 credit
(Prerequisites: Offered 10—12)*

Students enhance word processing and communication skills as they develop competencies needed by administrative support professionals. Students study office procedures such as information processing, telecommunications, electronic record management, and financial records management.

CAREER & TECHNICAL EDUCATION

Accounting (6320) - 1 credit

(Prerequisites: Offered in grades: 10-12)

Accounting students study the basic principles, concepts, and practices of the accounting cycle for a service business and a merchandising business. Topics covered include analyzing transactions, journalizing and posting entries, preparing payroll records and financial statements, and managing cash control systems. Business ethics and professional conduct are emphasized. Students learn fundamental accounting procedures, using both manual and electronic systems.

Accounting Advanced (6321) – 1 credit

(Prerequisites: Offered in grades: 11-12, Accounting)

Advanced Accounting students gain knowledge of advanced accounting principles, procedures, and techniques used to solve business problems and make financial decisions. Students work in a technology-integrated environment, using accounting and spreadsheet software to analyze, synthesize, evaluate, and interpret business financial data related to inventory, fixed assets, notes/accounts payable and receivable, implementation of a partnership and a corporation, and other specialized accounting systems. Using authentic workplace scenarios that reflect current industry trends and standards, students analyze financial data and acquire knowledge of business ethics.

Computer Information Systems (6612) – 1 credit

(Prerequisites: Offered in grades: 9-12)

Students apply problem-solving skills to real-life situations through word processing, spreadsheets, databases, multimedia presentations, and integrated software activities. Students work individually and in groups to explore computer concepts, operating systems, networks, telecommunications, and emerging technologies.

Computer Information Systems Advanced (6613) – 1 credit

(Prerequisites: Offered in grades: 10-12; Computer Information Systems with a recommended grade of “C” or better).

Students apply problem-solving skills to real-life situations through advanced integrated software applications, including printed, electronic, and Web publications. Students work individually and in groups to explore advanced computer maintenance activities, Web site development, programming, networking, emerging technology, and employability skills.

Programming (6640) – 1 credit

(Prerequisites: Offered in grades: 10-12)

Students in the Programming course explore programming concepts, use algorithmic procedures, implement programming procedures with one or more standard languages, and master programming fundamentals. Coding is used throughout the course. Graphical user interfaces may be used as students design and develop interactive multimedia applications, including game programs. In addition, students employ HTML or JavaScript to create Web pages. Students develop their employability skills through a variety of activities.

Modeling and Simulation Technology (8460) – 1 credit

(Prerequisites: Offered in grades: 10-12)

Students will explore the use of modeling, simulation, and game development software to solve real-world problems in science, technology, engineering, and mathematics (STEM). The activities will include evaluating and testing engineering designs, modeling geospatial data, observing and analyzing physics simulations, programming games for educational purposes, and creating visualization systems with 3D models. Students will develop an understanding of the systems, processes, tools, and implications of the field of modeling and simulation technology.

BUSINESS AND INFORMATION TECHNOLOGY CO-OP'S

Co-op Business and Information Technology (C-Semester;

Y-Yearlong; Offered in Grade 12) Must be enrolled in a Business and Information Technology class first or second semester.

A Co-op student is required to work a minimum of 396 hours for one credit and 540 hours for two credits each semester. On-the-job training will take place during school, after school, and on weekends both first and second semester. Co-op employees received training, money, and school credit for completing both the class work and on-the-job training. The student is responsible for obtaining a school approved position and will need to fill out a Co-op education application. The student is also responsible for maintaining monthly hours and wage logs and must submit them to the Co-op coordinator. The job must be approved by Co-op coordinator or CTE director prior to the end of the school year preceding enrollment. The student must meet with the Co-op coordinator before any change in employment can occur during the school year. A student will be removed from the program and will not receive credit for Co-op if they fail the directly related class. A student will be removed from the program if any violations of the agreement occur and will be placed in a class based on availability.

MARKETING EDUCATION

Sports and Entertainment Marketing (8175)–1 credit

(Prerequisites: Offered in Grades: 9-12)

This introductory course helps students develop a thorough understanding of fundamental marketing concepts and theories as they relate to the sports and entertainment industries. Students will investigate the components of customer service skills, branding, product development, pricing and distribution strategies, business structures, sales processes, social media, sponsorships and endorsements, as well as promotion plans needed for sports and entertainment events. The course also supports career development skills and explores career options. Academic skills (mathematics, science, English, and history/social science) related to the content are a part of this course. This course is “hands on” and project-driven, designed to give students opportunities to learn what it would be like to work in the sports and entertainment industries by completing an online simulation where they will run their own stadium.

CAREER & TECHNICAL EDUCATION

Marketing (8120) - 1 credit

(Prerequisites: Offered in Grades: 10-12)

Students examine activities in marketing and business important for success in marketing employment and postsecondary education. Students will learn how products are developed, branded, and sold to businesses and consumers. Students will analyze industry trends and gain hands-on experience in the marketing of goods, services, and ideas. Topics will include professionalism in the workplace, product planning and positioning, promotion, pricing, selling, economic issues, and the impact of technology on the marketplace. This course reinforces mathematics, science, English, and history/social science Standards of Learning (SOL). Computer/technology applications and DECA activities enhance the course. DECA, the co-curricular student organization, offers opportunities in leadership, community, and competitive events.

Marketing Advanced (8130) - 1 credit

(Prerequisites: Offered in Grades: 11-12, Marketing or Sports, Entertainment Marketing, or Photojournalism Marketing)

Students build on knowledge gained in a prior Marketing course. Students participate in supervisory and management activities focusing on the marketing mix, purchasing, financing, human resources, global marketing, pricing, and emerging technologies. Students will prepare for advancement in marketing careers and postsecondary education. This course reinforces mathematics, science, English, and history/social science Standards of Learning (SOL). Computer/technology applications and DECA activities enhance the course. DECA, the co-curricular student organization, offers opportunities in leadership, community, and competitive events. Students will also obtain a further understanding of the career options available within the fields of Marketing. This course is "hands on" and project driven to give students opportunities to learn what it would be like to work in the Marketing field by completing an online simulation where they will run their own business and will compete against each other in class to see who has what it takes to run their own business

MARKETING CO-OP'S

Co-op Marketing (C-Semester; Y-Yearlong; Offered in Grade 12)
Must be enrolled in a Marketing class first or second semester

A Co-op student is required to work a minimum of 396 hours each semester. On-the-job training will take place during school, after school and on weekends both *1st and 2nd semester*. Co-op employees receive training, money, and school credit for completing both the class work and on-the-job training. The student is responsible for obtaining a school approved position and will need to fill out a Co-op education application. The student is responsible for maintaining monthly hours and wage logs and must submit them to the Co-op coordinator. The job must be approved by Co-op coordinator or CTE director prior to the end of the school year preceding enrollment. The student must meet with the Co-op coordinator before any change in employment can occur during the school year. A student will be removed from the program if any violations of the agreement occur and placed in a class on availability. Students who register for the Marketing Co-op must be enrolled in one of the following during the school year: Sports and Entertainment Marketing (8175); Marketing (8120); Advanced Marketing (8130).

TECHNOLOGY EDUCATION

Technology Foundations (8403) - 1 credit

(Prerequisites: Offered in Grade 8)

In this beginning high school course, students acquire a foundation in technological material, energy, and information and apply processes associated with the technological thinker. Challenged by laboratory activities, students create new ideas and innovations, build systems, and analyze technological products to learn further how and why technology works. They work in groups to build and control systems using engineering design in the development of a technology.

Technical Drawing and Design (8435) - 1 credit

(Prerequisites: Offered in Grades: 9-12)

Technical Drawing/Design is a foundation course for students to experience the basic language of industry and technology. Students design, sketch, and make technical drawings, models, or prototypes of real design problems. The course is especially recommended for future engineering and architecture students.

Engineering Drawing and Design (8436) - 1 credit

(Prerequisites: Offered in Grades: 10-12. Technical Drawing and Design)

Students explore the engineering design process and use a graphic language for product design, technical illustration, assembly, patent, and structural drawings. They increase their understanding of drawing and the design process and techniques learned in the prerequisite course. Students use computers, calculators, and descriptive geometry and adhere to established standards to solve design problems.

Drafting I- (8530) - 1 credit (Offered in Grades 9-12)

Students explore drafting careers and are introduced to the theory and the manipulative skills necessary to produce and complete accurate drawings based on the ideas and sketches of engineers, architects, and designers. Students begin to focus on performing mechanical drafting and design operations, using CADD.

Drafting II- (8531) - 2 credits

(Offered in Grades 9-12; Prerequisites: 1 block each semester, Drafting I)

Students master the theory and manipulative skills necessary to produce complete and accurate drawings based on the ideas and sketches of engineers, architects, and designers. Students focus on performing mechanical drafting and design operations, using CADD, and exploring careers in drafting including industry certification options.

Drafting III- (8532) - 2 credits (Offered in grades 11-12; Prerequisites: 1 block each semester, Drafting II)

Students are taught the theory and the manipulative skills necessary to produce and complete accurate drawings based on the ideas and sketches of engineers, architects, and designers. Students focus on performing architectural drafting and design operations, using CADD, and exploring careers in drafting, including industry certification options.

CAREER & TECHNICAL EDUCATION

FAMILY AND CONSUMER SCIENCES

Independent Living (8219) - 1 credit (Prerequisites: Offered in Grades: 8-12)

Students in Independent Living build life skills focusing on establishing positive relationships, balancing work and family life, investigating careers, making responsible consumer choices, applying nutrition and wellness knowledge, and studying child development and parenting.

Introduction to Culinary Arts (8250) -1 credit (Prerequisites: Offered in grades 9-12)

The Introduction to Culinary Arts curriculum provides students with opportunities to explore career options and entrepreneurial opportunities within the food service industry. Students investigate food safety and sanitation, explore culinary preparation foundations, practice basic culinary skills, explore diverse cuisines and service styles, investigate nutrition and menu development, and examine the economics of food. The curriculum places a strong emphasis on science and mathematics knowledge and skills.

*Culinary Arts I (8275) -2 credits (2 blocks per day)
(Prerequisites: Introduction to Culinary Arts or Nutrition and Wellness; Offered in grades 10-11)*

The Culinary Arts I curriculum provides students with the foundations for a comprehensive knowledge of the food service industry and with opportunities to build technical skills. Students examine and practice basic rules and procedures related to kitchen and food safety, kitchen sanitation procedures, and emergency measures. Students explore the purchasing and receiving of goods and study fundamental nutritional principles and guidelines. As they explore food-preparation techniques, students practice applying these techniques to the preparation and serving of basic food products. The curriculum places a strong emphasis on science and mathematics knowledge and skills.

*Culinary Arts II (8276) – 2 credits (2 blocks per day)
(Prerequisites: Culinary Arts I; offered in grades 11-12)*

The Culinary Arts II curriculum provides students with continuing opportunities to acquire a comprehensive knowledge of the food service industry as well as to expand their technical skills. Students practice kitchen safety and sanitation, apply nutritional principles to food preparation and storage, perform a wide range of more advanced food-preparation techniques including garde manger and baking, refine their dining room serving skills, develop menus, perform on-site and off-site catered functions, and strengthen their business and math skills. The curriculum continues to place a strong emphasis on science and mathematics knowledge and skills.

*Introduction to Interior Design (8255) – 1 credit
(Prerequisites: Offered in Grades: 9-12)*

The Introduction to Interior Design students explore the influences on the design of interior spaces, investigate careers in the interior design industry, and focus on the technical and soft skills necessary for employment in the field of interior design. Students develop an interior design project that meets specific criteria and includes the elements and principles of design.

*Introduction to Fashion Careers (8248)-1 credit
(Prerequisites: Offered in Grades: 9-12)*

Students in *Introduction to Fashion Careers* focus on identifying and exploring the individual careers within the apparel, accessory, and textile design, manufacturing, and merchandising industry. Units of study include the relationships that exist among all areas of the clothing industry; related global and economic issues; apparel, accessory, and textile technology; exploration of careers, including entrepreneurial opportunities in related areas; and the skills and personal characteristics necessary for success in careers in the apparel, accessory, and textile design, manufacturing, and marketing industry.

*Child Development & Parenting (8232) – 1 credit
(Prerequisites: Offered in Grades: 9-12)*

Students enrolled in Child Development and Parenting focus on balancing work and family; analyzing parenting roles and responsibilities; ensuring a healthy start for mother and child; evaluating support systems that provide services for parents; and evaluating parenting practices that maximize human growth and development..

*Introduction to Early Childhood Education and Services (8234)
– 1 credit (Prerequisites: Offered in Grades: 10-12)*

Students focus on careers related to the early childhood field through hands-on exploration, projects, and cooperative learning experiences, including an overview of principles of child growth and development; appreciation of diversity; engaging learning experiences for children; principles of appropriate and effective guidance; healthy and safe environments; and development of self-concepts and building self-efficacy.

*Virginia Teachers for Tomorrow I (9062) – 1 credit
(Prerequisite: 3.0 GPA and Teacher Recommendation; Offered in Grades 11- 12, Grade 12 priority).*

Virginia Teachers for Tomorrow (VTfT) fosters student interest, understanding, and appreciation of the teaching profession and allows secondary students to explore careers in education. Students build a foundation for teaching; learn the history, structure and governance of teaching; apply professional teaching techniques in the VTfT classroom and field experience; and reflect on their teaching experiences. Additional educational leadership opportunities are offered through the student organization, Educators Rising.

Note: Virginia Teachers for Tomorrow I may be offered as a complement to an existing concentration sequence in any Career Cluster. In some instances, where noted, it may be combined with specific courses to create concentration sequences.

CAREER & TECHNICAL EDUCATION

FAMILY AND CONSUMER SCIENCES CO-OP'S

Co-op Introduction to Early Childhood, Education, and Services-8234(C-Semester; Y-Yearlong; Offered in Grade 12) Must be enrolled in a Family and Consumer Science class first or second semester

A Co-op student is required to work a minimum of 396 hours each semester. On-the-job training will take place during school, after school, and on weekends both first and second semester. Co-op employees received training, money, and school credit for completing both the classwork and on-the-job training. The student is responsible for obtaining a school approved position and will need to fill out a Co-op education application. The student is also responsible for maintaining monthly hours and wage logs and must submit them to the Co-op coordinator. The job must be approved by Co-op coordinator or CTE director prior to the end of the school year preceding enrollment. The student must meet with the Co-op coordinator before any change in employment can occur during the school year. A student will be removed from the program if any violations of the agreement occur and placed in a class based on availability. Students who register for Family and Consumer Sciences Co-op must be enrolled in one of the following during the school year: Introduction to Culinary Arts (8250/36 Weeks); Culinary Art I (8275); Culinary Arts II (8276); Introduction to Interior Design (8255); Introduction to Fashion Careers (8248); Child Development and Parenting (8232); Introduction to Early Childhood Education and Services (8234); Virginia Teachers for Tomorrow I (9062); Introduction to Hospitality, Tourism, and Recreation (8259); Hospitality, Tourism, and Recreation I (8202).

Introduction to Hospitality, Tourism, and Recreation (8259) – 1 credit (Offered in Grades 9-12)

Students enrolled in introduction to Hospitality, Tourism, and Recreation focus on developing professional skills and using emerging technologies to prepare for employment in this global industry, rich in diverse career opportunities. The program includes instruction in the industries of lodging, food and beverage, travel and tourism, and recreation and fitness.

Hospitality, Tourism, and Recreation I (8202) – 2 credits (Offered in Grades 9-12; Prerequisite: 2 block per day, Introduction to Hospitality, Tourism, and Recreation.)

Students begin preparation for employment in hospitality industries by focusing on principles of operations in food services, recreation, hospitality planning, and business relations. Special attention is paid to the development of culinary skills (food sanitation, food preparation, and serving) and customer service skills.

HEALTH AND MEDICAL SCIENCES

Students who successfully complete *Nurse Aide I & Nurse Aide II* may choose to take the Nurse Aide Certification Exam for certification as a nurses' assistant. To be eligible to take the certified nursing assistant exam, a student must complete *Nurse Aide I & Nurse Aide II* with an average of 80% or higher, and have completed 120 hours of classroom time and 40 hours of clinical time. Upon passing the exam, students will receive two verified credits. *Students will be required to take both Nurse Aide I & Nurse Aide II in the same year, and should plan their schedules to accommodate this.*

Introduction to Health and Medical Services (8302) – 1 credit (Prerequisites: Offered in Grades 9-12)

This course introduces the student to a variety of healthcare careers and develops basic skills required in all health and medical sciences. It is designed to help students understand the key elements of the U.S. healthcare system and to learn basic healthcare terminology, anatomy and physiology for each body system, pathologies, diagnostic and clinical procedures, therapeutic interventions, and the fundamentals of traumatic and medical emergency care. Throughout the course, instruction emphasizes safety, cleanliness, asepsis, professionalism, accountability, and efficiency within the healthcare environment. Students also begin gaining job-seeking skills for entry into the health and medical sciences field. In addition, instruction may include the basics of medical laboratory procedures, pharmacology fundamentals, biotechnology concepts, and communication skills essential for providing quality patient care.

Nurse Aide I(8360)- 2 credits

(Prerequisites: 2 blocks per day in fall semester, offered in Grades 10-12 Priority given to juniors and/or Intro to Health Occupation students; application and interview required).

Nurse Aide I, offered as an occupational preparation course beginning at the 11th-grade level, emphasizes the study of nursing occupations as related to the health care system. Students study normal growth and development, simple body structure and function, and medical terminology and are introduced to microbes and disease. They receive elementary skill training in patient-nursing assistant relationships; taking and recording of vital signs; cardiopulmonary resuscitation; and bathing, feeding, dressing, and transporting of patients in hospitals and nursing homes. Limited on-the-job instruction in nursing homes and hospitals is part of the course. This course can be used as an introduction to practical nursing or to prepare the student for Nurse Aide II so that all competencies for a certified nursing assistant are met.

Commonwealth of Virginia Regulations Governing Certified Nurse Aides Virginia Board of Nursing:

www.dhp.virginia.gov/nursing/leg/CNA_02272014.doc

Nurse Aide II (8362) – 2 credits

(Prerequisites: 2 Blocks per day in spring semester; Offered in Grades: 10-12; Nurse Aide I; application and interview required)

Nurse Aide II is an occupational preparation course, emphasizing advanced skill training in areas such as catheter care, range of motion, bowel and bladder training, care of the dying, selected procedures for maternal and infant care, and admission and discharge procedures. Students learn diseases and body systems as related to advanced clinical care of the acute medical-surgical patient, the chronically ill, and the elderly. On-the-job instruction in a licensed nursing home is part of the course. Upon completion of the nurse aide program, the student is eligible to take the nurse aide certification exam that leads to employment as a certified nurse aide in hospitals and nursing homes.

Commonwealth of Virginia Regulations Governing Certified Nurse Aides Virginia Board of Nursing:

www.dhp.virginia.gov/nursing/leg/CNA_02272014.doc

CAREER & TECHNICAL EDUCATION

HEALTH & MEDICAL SCIENCES CO-OP

Co-op Nurse Aide II – 8362 (C- Semester; Y-Yearlong; Offered in Grade 12) Must be enrolled in Anatomy and Physiology (Honors) (4330H) during the school year and must have received CNA License.

A Co-op student is required to work a minimum of 396 hours each semester. On-the-job training will take place during school, after school, and on weekends both first and second semester. Co-op employees received training, money, and school credit for completing both the classwork and on-the-job training. The student is responsible for obtaining a school approved position and will need to fill out a Co-op education application. The student is also responsible for maintaining monthly hours and wage logs and must submit them to the Co-op coordinator. The job must be approved by Co-op coordinator or CTE director prior to the end of the school year preceding enrollment. The student must meet with the Co-op coordinator before any change in employment can occur during the school year. A student will be removed from the program if any violations of the agreement occur and placed in a class based on availability.

Students who register for Health and Medical Sciences Co-op must have successfully completed the Nurse Aide I and Nurse Aide II class and must have received the CNA License as a result of passing the CNA exam.

Students must be enrolled in the following class during the school year Anatomy & Physiology (Honors) (4430H); Firefighting/EMT Academy (8705 and 8706).

SCHOOL TO WORK

Career Education (0118) - 1 credit

(Prerequisites: Offered in Grade: 12; May be taken only one time. Students have successfully completed core area subjects to date and are grade appropriate. An application is required with a recommendation for final approval by the administration).

This course is for designated students who are interested in working in school support services such as: office assistants, tutors, library aides, etc. All students participating in this program are required to sign a contract of agreement stating expectations and responsibilities of the participant.

Public Service (9828) - 1 credit

(Prerequisites: Offered in Grade: 12, Students who have successfully completed all courses and are scheduled to graduate in June. An application is required with a recommendation for final approval by the administration.

Students will work within the community performing intern responsibilities. This internship should be within a field of interest to the student and allow the student to experience future job expectations. As a student practicing in the community, performance is of the utmost importance. Students will log daily activities, be evaluated by a job supervisor, and write a 1-2 page paper on work-related experiences each six-weeks. Students will sign contracts dealing with each selected position. Students must provide their own transportation.

CAREER & TECHNICAL EDUCATION

U.S. ARMY JUNIOR RESERVE OFFICER TRAINING CORPS (JROTC)

The mission of the JROTC program is to motivate young people to be better citizens. JROTC is not a recruiting program for the Armed Forces, and cadets do not incur any obligation for military service. The objectives of JROTC are to develop good citizenship, self-reliance, leadership, and an appreciation of the role of the U.S. Armed Forces, an ability to communicate effectively, and a desire to maintain a healthy lifestyle. The program of instruction at each Leadership, Education, and Training (LET) level (1-8) is divided into six units.

Unit 1 – Introduction to JROTC

Unit 2 – Leadership Theory and Application Unit 3 – Foundations for Success

Unit 4 – Wellness, Fitness and First Aid Unit 5 – Geography and Earth Science

Unit 6 – Citizenship and American History

In addition to regular instruction, co-curricular activities include the cadet color guard, drill team, rifle team, and raider team. Voluntary weekend field trips and community service activities are available, and cadets may be selected to attend various youth leadership conferences and Junior Cadet Leadership Camp (JCLC).

Cadets completing Level 2 will receive higher rank in one of the military services or advanced placement of up to two years in a Senior ROTC program at the college level. As an Honor Unit with Distinction for outstanding performance, cadets in the Patrick County High School Army Junior ROTC receive special consideration for scholarships in the Senior Army ROTC program and also applications for the Service Academies.

Cadets are required to wear the uniform once a week. Uniforms, including those for special teams, are provided at no cost. Cadets will only be charged if the uniforms are lost or damaged. Cadets must meet appearance standards while in uniform and while participating in JROTC activities. Cadets earn rank based on performance and demonstrated leadership throughout the semester. Ribbons, medals, and other awards are given to cadets for participation in various activities and for outstanding performance in the program.

NOTE: A complete description of the Army Junior ROTC program and curriculum is available at the JROTC Web Portal <http://portal.usarmyjrotc.com>.

Army Junior ROTC I (7913) and Army Junior ROTC II (7916) – 1 credit each (Prerequisites: Each level must be taken in sequence; Offered in Grades 9-12)

Army Junior ROTC I and Army Junior ROTC II introduce the student to JROTC, including wearing of the uniform, customs and courtesies of the service, respect to the Flag, and drill. Cadets also learn basic leadership theory, drill and ceremonies, basic map reading skills, oral communications, and fitness.

Army Junior ROTC III (7918) and Army Junior ROTC IV (7919) – 1 credit each (Prerequisites: Offered in grades 10-12; Each level must be taken in sequence).

These levels emphasize intermediate leadership development. Cadets are given leadership positions at the squad and platoon level as cadet sergeants. They can be advanced further based on performance and demonstrated leadership.

Military Science V—Leadership (7920) and Military Science VI—Leadership (7922) – 1 credit each (Prerequisites: Offered in grades 11-12; Each level must be taken in sequence).

These levels emphasize intermediate leadership development. Cadets may be given leadership positions at the company level or on the battalion staff as cadet senior sergeants or cadet officers.

Military Science VII—Leadership (7924) and Military Science VIII—Leadership (7926) 1 credit each (Prerequisites: Offered in grades 12; Each level must be taken in sequence).

Students can advance to the highest positions within the JROTC unit and experience the duties and responsibilities of leaders and staff officers within a large organization. The students conduct all the planning that is required to run the JROTC unit and ensure successful execution of all tasks assigned. They receive advanced instruction in citizenship, leadership, life skills, wellness, fitness, first aid, geography and environmental awareness and American history and government.

CAREER & TECHNICAL EDUCATION

COMPUTER SYSTEMS TECHNOLOGY

*Information Technology (IT) Fundamentals (6670)- 1 credit
(Prerequisites – offered in Grades 9-12. Keyboarding course(s)
or teacher-approved demonstration and documentation of touch
keyboarding skills.)*

Information Technology (IT) Fundamentals introduces the essential technical and professional skills required for students to pursue programs leading to professional careers and IT certifications. Students investigate career opportunities and technologies in four major IT areas: Information Services and Support, Network Systems, Programming and Software Development, and Interactive Media. Students will evaluate the impact of IT on other career clusters. The focus of the IT Fundamentals course is the introduction of skills related to information technology basics, Internet fundamentals, network systems, computer maintenance/upgrading/troubleshooting, computer applications, programming, graphics, Web page design, and interactive media. Students explore ethical issues related to computers and Internet technology and develop teamwork and communication skills that will enhance their employability.

*Computer Systems Technology I (8622) - 1 credit - Offered in
Grades: 9-12)*

Students enter the world of computer technology and gain practical experience in assembling a computer system, installing an operating system, troubleshooting computers and peripherals, and using system tools and diagnostic software. They develop skills in computer networking and resource sharing. In addition, students explore the relationships between internal and external computer components. Emphasis is placed on customer service skills and career exploration. Upon successful completion of the course, students may qualify to take the A+ certification exam.

*Computer Systems Technology II (8623) –2 credits
(Prerequisites Offered in Grades: 10-12, Computer Systems
Technology I, 1 block per day each semester)*

Building on the foundation of Computer Systems Technology I, this advanced course provides students with training in procedures for optimizing and troubleshooting concepts for computer systems and subsystems. Students explore wireless technologies (e.g., Bluetooth, Wi-Fi) and create and configure a network. Emphasis is placed on technical proficiency, skill-building, and workplace readiness. The course prepares students for postsecondary education and training and a successful career in information technology. Upon successful completion of the course, students may qualify to take the A+ certification exam.

AUTO TECHNOLOGY

*Automotive Technology I (8506) -2 credits
(Prerequisites: Offered in Grade: 10-11)*

Due to recent technological advancements in automobiles, it is crucial that technicians are prepared with state-of-the-art technology and training. This course represents a large sampling of the competencies from National Automotive Technician's Education Foundation's (CNATEF's) Maintenance and Light Repair accredited program.

Students are provided instruction in all systems as they prepare for the ASE (Automotive Service Excellence) Student Certification, "the first step in building a career as a service professional in the automotive industry."

*Automotive Technology II (8507) -2 credits (Prerequisites Auto
Technology I: Offered in Grade: 11-12; 2 blocks)*

This course represents the advanced competencies from National Automotive Technician's Education Foundation's (CNATEF's) Maintenance and Light Repair accredited program without redundancy from the prerequisite course. Students are provided instruction in all systems as they prepare for the ASE (Automotive Service Excellence) Student Certification, "the first step in building a career as a service professional in the automotive industry." Successful completion of this course will result in program completion and prepare students to pass the equivalent NATEF student exam and ultimately attain certification.

*Motorsports Technology I– Fall Semester (8509) –2 credits
(Offered at PHCC—Martinsville) (Prerequisites: Offered in 12th
grade. 2 Blocks per day: each semester; interview; Passing score on a
placement test administered by Patrick Henry Community College.
Students will receive 3 college credits for MTS 125*

Motorsports Technology I provides a foundation in the principles of racecar fabrication and all facets of the racing industry. Technical aspects of the course include skill development in vehicle assembly using specialty tools and welding. Students explore the motorsports technology industry and identify careers in the field.

*Motorsports Technology II– Spring Semester (8510) – 2 credits
(Offered at PHCC—Martinsville) (Prerequisites: Offered in 12th
grade. 2 Blocks per day: each semester; interview; Passing score
on a placement test administered by Patrick Henry Community
College. Students will receive 3 college credits for MTS 126*

Motorsports Technology II further develops students' skills in racecar fabrication as they explore the motorsports technology industry. Students gain experience in chassis preparation, vehicle assembly, and engine assembly and disassembly. Additional focus areas include racing protocol and regulatory compliance in the motorsports field.

****The fall and spring semesters must be taken in sequence to get credit for the class.**

BUILDING TRADES

*Construction Technology (8431)-1 credit
(Prerequisite: None; offered in Grades 8-9; 10th graders may
enroll after all 8th and 9th graders interested if number does not
exceed 20)*

Students design and build scale or full-size structures and work with projects that help them understand the jobs of architects, carpenters, electricians, plumbers, surveyors, contractors, masons, design engineers, and a variety of other construction careers. They also explore aspects of the construction industry.

CAREER & TECHNICAL EDUCATION

Building Trades I (8515)–1 credit (Prerequisite: None; Offered in Grades 10-11)

Building Trades I introduces students to skills in the four core areas of residential construction: masonry, carpentry, electricity, and plumbing. Students emphasize safety by preparing to earn the OSHA 10 card as they build or repair entire residential structures, using a variety of materials and tools.

Building Trades II (8516) (Year) –2 credits (Prerequisite: Recommended “C” in Building Trades I; Offered in Grades 11-12.)

Building Trades II teaches students advanced skills in masonry, carpentry, electricity, and plumbing. The class prepares students to synthesize these valuable skills to build or repair complete residential structures, using a variety of materials and tools.

HVACR I (8503) (Year) – 4 credits (Offered at PHCC – Martinsville) (Prerequisite: Offered in Grade 12; 2 blocks per day; Instructor Interview; passing score on a placement test administered by Patrick Henry Community College. Students will receive college credits if they pass the course with a “C” or better.)

Fall Semester—Teaches refrigeration principles and systems, characteristics of refrigerants, temperatures and pressures. Instructional methods will include lecture/discussion, lab projects. Graduates of the HVAC program will have demonstrated mastery of generic and specific residential, commercial and industrial occupational skills relative to the field. Graduates will be prepared for EPA certification.

Spring Semester—Teaches principles of electricity covering fundamentals, devices and components of both DC and AC circuits. Instructional methods include lecture, discussion and class projects.

****The fall and spring semesters must be taken in sequence to get credit for the class.**

TRADE AND INDUSTRIAL EDUCATION CO-OP:

Co-op Trade and Industrial Education Co-op (C-Semester; Y-Yearlong; Offered in Grade 12)

A Co-op student is required to work a minimum of 396 hours each semester. On-the-job training will take place during school, after school, and on weekends both first and second semester. Co-op employees received training, money, and school credit for completing both the classwork and on-the-job training. The student is responsible for obtaining a school approved position and will need to fill out a Co-op education application. The student is also responsible for maintaining monthly hours and wage logs and must submit them to the Co-op coordinator. The job must be approved by Co-op coordinator or CTE director prior to the end of the school year preceding enrollment. The student must meet with the Co-op coordinator before any change in employment can occur during the school year. A student will be removed from the program if any violations of the agreement occur and placed in a class based on availability. Students who register for Trade and Industrial Education Co-op must be enrolled in one of the following

during the school year: Auto Technology I (8506); Auto Technology II (8507); Motorsports Technology I (8509); Motorsports Technology II (8510); Building Trades II (8516); HVACR (8503); Technical Drawing and Design (8435); Engineering Drawing and Design (8436); Drafting I (8530); Drafting II (8532); Drafting III (8532); Information Technology (IT) Fundamentals (6670); Computer Systems Technology (8622); Computer Systems Technology (8623).

COSMETOLOGY

Cosmetology I (8527) 2 credits (Prerequisites: 1 Block per day each semester; Offered in Grades 10-11; application and interview required.)

In this introductory course, students study hair, skin, and nails and their related care. Students are grounded in theory as they prepare to practice procedures in a clinical lab setting or classroom, using manikins for manipulative skill practice. The first-year course emphasizes personal safety, professionalism, and sanitation and disinfection of equipment and facilities. Students develop skills in shampooing and conditioning hair, as well as styling and cutting hair. They are introduced to chemical texture services and develop skills in manicure and pedicure procedures.

Cosmetology II (8528) – 2 credits (2 blocks per day first semester) (Prerequisites: Offered in Grades 11-12; Cosmetology I).

In this continuing course, students build on their theoretical foundation of general sciences and practices in cosmetology to increase proficiency in hair cutting and styling on live models, with attention to professionalism, client consultation, safety, and infection control. Students are trained in safe chemical processes related to permanent waves, relaxers, lightening, and coloring hair. In addition, students learn to care for skin, hands, and feet, developing experience in providing facials, manicures, pedicures, and nail enhancements. Students will be introduced to a business management unit with a focus on managing the salon.

Cosmetology III (8529) 2 credits Prerequisites: Offered in grades 11 and 12 Cosmetology I & Cosmetology II (2 blocks per day in Spring semester)

In this advanced course, students build on their theoretical foundation of general sciences and practices in cosmetology to increase proficiency in hair cutting and styling on live models, with attention to professionalism, client consultation, safety, and infection control. Students are trained in safe chemical processes related to chemical texture services and advanced hair coloring techniques. They also develop artistic skills with wigs and hair additions. In addition, students learn to care for skin, hands, and feet, developing experience in providing facials, manicures, pedicures, and nail enhancements. An advanced business management unit focuses on managing the salon. Competency completion prepares the student for the Virginia State Licensing Exam. Students can combine classroom instruction and supervised on-the-job training in an approved position or internship with continuing supervision throughout the school year.

CAREER & TECHNICAL EDUCATION

COSMETOLOGY CO-OP:

*Co-op Cosmetology II - 8528: (C-Semester; Y-Yearlong;
Offered in Grade 12) Must be enrolled in Cosmetology II both
first and second semester*

The State Board of Cosmetology has approved and endorsed the “school to work” program for Cosmetology and Nail Technology programs. This allows students to work as trainees in salons under strict supervision of a licensed professional. The Virginia State Board of Cosmetology’s rules and regulations and Patrick County High School’s Co-op agreement will govern the students work experience. Students participating in this program must maintain a “C” average in Cosmetology II and are required to sign a contract of agreement stating the responsibilities and expectation of the student. A Co-op student is required to work a minimum of 396 hours each semester. The student is responsible for obtaining a school approved position and will need to fill out a Co-op education application. The student is also responsible for maintaining monthly hours and wage logs and must submit them to the Co-op coordinator. The job must be approved by Co-op coordinator or CTE director prior to the end of the school year preceding enrollment. The student must meet with the Co-op coordinator before any change in employment can occur during the school year. A student will be removed from the program if any violations of the agreement occur and placed in a class based on availability. Students who register for Career Connections Co-op must be enrolled in the following during the school year: Cosmetology II (8528).

Patrick Henry Community College

Patrick Henry Community College offers several career specific programs that include Electricity, Motorsports Technology, Building Trades, and Computer Aided Drafting. If dual enrollment at PHCC is desired, a placement test must be taken. Students interested in these courses must submit a written request to the principal who will work collaboratively with PHCC instructors to develop a student schedule incorporating high school/PHCC course offerings.

The courses offered at PHCC will be based at the main campus, located in Martinsville, VA.

D-SQUARED

D² or D-Squared

D² is a partnership between Patrick Henry Community College and Patrick County Public Schools. Students admitted to the D² program will earn an Associate's Degree from Patrick Henry Community College by taking courses during their junior and senior years of high school. The Advanced Placement curriculum will be taught in several identified courses offered at PCHS. **Upon completion of an advanced placement class, students are eligible to take the Advanced Placement exam.**

All courses will be taught at PCHS and PHCC Stuart site. It is required that students complete their third year of foreign language and Trigonometry by the end of their sophomore year. It is important for students and parents to understand that completing this program may allow students to enter college as a Junior and could be faced with the demands of the associated Junior level curriculum.

Students interested in enrolling should contact the Director of Student Services the spring of their sophomore year for an application. Admission to the D² Program is based upon the following criteria: GPA, SOL scores, PHCC placement test scores, teacher recommendations and acceptance to Patrick Henry Community College. There must be a minimum of fifteen students enrolled in the cohort for the D-Squared to be offered.

Sample Junior Course Descriptions

Fall:

Introduction to Speech Communication – 1 high school credit (DE1395) (CST 110: 3 college credits)

In this course, students will examine the elements affecting speech communication at the individual, small group and public communication levels with emphasis on practice of communication at each level.

College Survival Skills - 1/2 high school credit (DE8475) (SDV 108 - 1 college credit)

This course assists students in transition to college and provides overviews of college policies, procedures, and curricular offerings. This course encourages contacts with other students and staff, assists students toward college success through information regarding effective study habits, career and academic planning, and other college resources available to students. College Survival Skills may include English and math placement testing and is strongly recommended for beginning students. This course is required for graduation.

Information Literacy - 1 high school credit (DE0121) (ITE 119 – 3 college credits)

Presents the information literacy core competencies focusing on the use of information technology skills. Skills and knowledge will be developed in database searching, computer applications, information security and privacy, and intellectual property issues.

AP/Honors English 1 - 1 high school credit (1150H) (ENG 111: 3 college credits)

AP/Honors English 11 incorporates the requirements for the regular English 11 classes in addition to extensive writing assignments and novel studies, as well as, summer reading assignments. This course introduces students to critical thinking and the fundamentals of academic writing. Through the writing process, students refine topics; develop and support ideas; investigate; evaluate and incorporate appropriate resources; edit for effective style and usage; and determine appropriate approaches for a variety of contexts, audiences, and purposes. Writing activities will include exposition and argumentation with at least one research project. SAT preparation will be included as a unit of study.

AP/DE Language and Composition—1 high school credit (1150AP) (ENG 112: 3 college credits)

This course offers advanced language studies and provides opportunities to practice a variety of rhetorical modes through assignment of frequent essays. Students read certain works of British, American, and world literature, and complete follow-up assignments requiring application of advanced techniques of literary analysis. A documented research paper and an oral presentation are required.

Honors Math Analysis/Pre-Calculus—1 high school credit (3162H) (MTH 166: 4 college credits)

Trigonometric and circular functions are introduced in this course. Evaluation of trigonometric functions, use of basic formulas, and laws of cosines and sines are presented. Emphasis is placed on the applications of trigonometry, solutions of trigonometric equations, applications of triangles and vectors, and polar graphing. Advanced topics in algebra, analytical geometry, polynomial functions, and sequences are also included.

1 Student Selected Elective

Spring:

Nutrition and Human Development – 1 high school credit (DE8390) (HLT 230 – 3 college credits)

Teaches the relationship between nutrition and human development. Emphasizes nutrients, balanced diet, weight control and the nutritional needs of an individual.

Intro to Theatre – 1 high school credit (1448DE) (CST 130 – 3 college credits)

Surveys the principles of drama, the development of theatre production and selected plays to acquaint the student with various types of theatrical presentations.

AP/Honors US/VA History—1 high school credit (2360H) (HIS 121-122: 6 college credits)

The focus of this course is on the major themes, events, and ideas that shaped the history of the United States. Students probe, in depth, the dynamics of American political and diplomatic decision-making, national and sectional interests, and a variety of personalities and social movements related to the development of the United States. Distinguishing characteristics of cultures are examined through literature, art, architecture, music, religion, philosophy and geography. Students will be required to write thoughtful and factually supported papers on historical topics.

D-SQUARED

Spanish IV Honors—1 high school credit (5540H)
(SPA 101-102: 8 college credits)

Spanish IV is a continuous building of vocabulary and grammatical structures through conversations, readings, and writings in the language. Students are expected to make acceptable and exclusive use of Spanish in classroom communication.

Advanced Chemistry – 1 high school credit (4410A)

In Advanced Chemistry, concepts introduced in Chemistry are extended and higher levels of subject matter and scientific investigations are explored. Laboratory techniques are refined and expanded with emphasis placed on the study of descriptive chemistry and chemical principles through the use of chemical models. Importance is placed on the student's development of a strong problem-solving orientation to chemistry.

Sample Senior Course Descriptions

Fall:

Supervised Study in Transfer Programs - 1/2 high school credit (0130DE) (SDV 199: 1 college credit)

This course provides experience in the preparation of applications for admission to senior institutions, exploring degrees and programs of study at the senior institutions, assessments of core competencies, and assistance with other needs such as housing, study habits, and financial aid when transitioning from the community college to the senior institution. In addition, this course assists students in understanding differences in community college life and academics and the senior institution.

AP/Honors English 12—1 high school credit (1160H)
(ENG 243-244: 6 college credits)

This course engages students in the careful reading and critical analysis of imaginative literature. Through the close reading of selected texts, students deepen their understanding of the ways writers use language to provide both meaning and pleasure for their readers. As they read, students consider a work's structure, style, and themes as well as such smaller-scale elements as the use of figurative language, imagery, symbolism, and tone.

Calculus Honors – 1 high school credit (3177H)
(MTH 175-176: 6 college credits)

Laboratory calculus provides a student with an opportunity to learn the classical calculus curriculum in an innovative technological manner and to apply all previous mathematics concepts and skills. The course is based on real life applications including, but not limited to, differential calculus of one variable including the theory of limits, derivatives, differentials, anti-derivatives and applications to algebraic and transcendental functions.

2 Student Selected Electives

Spring:

Honors/AP US/VA Government—1 high school credit (2440H)
(2440AP) (PLS 211-212: 6 college credits)

AP/Honors US/VA Government provides students with challenging assignments in reading, analysis, synthesis, writing, and speaking. Students examine the principles and practices of government, particularly of American government, at national, state, and local levels. The framework for this course includes units on the development of the theories of government, law and the justice system, and current domestic and foreign policy. Students will be required to differentiate among the operations of each of the levels of the United States Government.

Spanish V H (55507) —1 high school credit (5550H) (SPA 201-202—8 college semester hours)

Spanish V is designed to increase the student's ability to comprehend and to use formal and informal spoken Spanish. Students are required to use Spanish exclusively in classroom communication. Course content includes formal and informal oral presentations, advanced grammar, short stories, Hispanic civilization and culture and the study of selected Spanish literary classics. Practice for the Advanced Placement Spanish Language Exam is given at various times during the course.

Biology Honors— 1 high school credit (4320H) (BIO 101-102:8 college credits)
(Prerequisite: Algebra II)

The course is a college-level introduction focusing on the fundamental characteristics of living matter from the molecular level to the ecological community level. The content introduces the diversity of living organisms, their structure, function and evolution. Topics covered include major concepts in molecular and cellular biology, microbiology, biochemistry, genetics, botany, physiology and ecology.

1 Student Selected Elective

D-SQUARED

Enrollment in these classes is contingent upon a student achieving a passing score on a PHCC placement test, acceptance in the course by the college, and availability of credentialed instructors. Fees are paid in accordance with school procedures. The total cost per credit hour at PHCC is \$132. This cost is covered by Patrick County Public Schools.

Family Educational Rights and Privacy Act (FERPA)

Notice for Directory Information

The *Family Educational Rights and Privacy Act (FERPA)*, a Federal law, requires that Patrick County Public Schools, with certain exceptions, obtain a parent's or legal guardian's written consent prior to the disclosure of personally identifiable information from their child's education records. However, Patrick County Public Schools may disclose appropriately designated "directory information" without written consent, unless parents or guardians have advised the school division to the contrary in accordance with procedures. The primary purpose of directory information is to allow Patrick County Public Schools to include this type of information from students' education records in certain school publications. Examples include:

- A playbill, showing your student's role in a drama production
- The annual yearbook
- Honor roll or other recognition lists
- Graduation programs
- Sports activity sheets, such as for wrestling, showing weight and height of team members

Directory information, which is information that is generally not considered harmful or an invasion of privacy if released, can also be disclosed to outside organizations without a parent's prior written consent. Outside organizations include, but are not limited to, companies that manufacture class rings or publish yearbooks. In addition, two federal laws require local educational agencies (LEAs) receiving assistance under the *Elementary and Secondary Education Act of 1965* (ESEA) to provide military recruiters, upon request, with three directory information categories – names, addresses and telephone listings – unless parents have advised Patrick County Public Schools that they do not want their student's information disclosed without their prior written consent.¹ If parents do not want Patrick County Public Schools to disclose directory information from their child's education records without their prior written consent, they must notify the school division in writing. Patrick County Public Schools has designated the following information as directory information:

- Student's name
- Address
- Telephone listing

¹These laws are: Section 9528 of the ESEA (20 U.S.C. 7908) as amended by the *No Child Left Behind Act of 2001* (P.L. 107-110), the education bill, and 10 U.S.C. 503, as amended by section 544, the *National Defense Authorization Act for Fiscal Year 2002* (P.L. 107-107), the legislation that provides funding for the Nation's armed forces.

AHERA Notification Concerning Asbestos Materials In School Buildings

All Patrick County Public Schools have been inspected for presence of asbestos containing materials. The results of these inspections have been compiled into a management plan for each school. These management plans are available in the main office of each school for inspection. Any individual who wishes may review these plans. Each six months, a specified maintenance technician inspects the building and assesses any building materials still containing asbestos. The technician verifies that the materials have not been damaged, deteriorated, or become friable by any other means causing a hazard to the occupants of the building. Should any situation be detected, it would be dealt with quickly by a trained and licensed abatement professional. Additionally, each three years, an independent contractor, who is trained and licensed in asbestos inspections and abatement, is employed to inspect each school to ensure the asbestos containment and that the removal plans are being followed. Also, this contractor
